JAMES F. GARRICK, Esq., M.L.A.

THE PUBLIC ARE REQUESTED TO NOTE:—

That as mistakes frequently occur in consequence of the similarity of title assumed by some of the new Life Offices recently established in Australia, the

AUSTRALIAN MUTUAL PROVIDENT SOCIETY

Is the Correct Designation of the

Oldest Mutual Life Office in Australia,

THE Directors invite attention to the following LIBERAL REGULATIONS:—

Members may travel throughout the world without license or extra premium.

No extra premium charged for residence in Queensland south of the 22nd parallel of south latitude.

PROOF OF AGE (of which no reasonable evidence is rejected) ACCEPTED WITH PROPOSAL, or at any time during the continuance of a policy.

POLICIES do not finally lapse until thirteen months after the surrender value is exhausted.

BONUSES may be surrendered at any time for their cash value, or may be applied to reduce premiums.

LOANS are granted to members to the extent of 90 per cent. of the surrender value of their policies.

All further information may be obtained on written or personal application to any of the Society's Agents, or to

ERNEST H. WEBB,
Resident Secretary, Brisbane.

CHANGES IN THE MINISTRY.

[The following Notifications were gazetted after a portion of *Slater's Queensland Almanac* had been sent from the publishing office];—

THE Hon. John Douglas, Esq., C.M.G., Secretary for Public Lands, to be Colonial Secretary, *vice* the Hon. William Miles. Esq., transferred to the office of Seerctary for Public Works; the Hon. George Thorn, Esq. Secretary for Public Works and Mines. to be Secretary for Public Lands, *vice* the Hon. John Douglas, Esq., transferred to the office of Colonial Secretary, and to retain the office of Secretary for Mines; the Hon. William Miles, Esq., Colonial Secretary, to be Secretary for Public Works, *vice* the Hon. George Thorn, Esq., transferred to the office of Secretary for Public Lands.

PREFACE.

SOME alterations have been made in the contents of the present issue of "Slater's Queensland Almanac," which it is believed will be found of advantage.

A Table has been added by which the time of Sunrise in any part of the Colony may be ascertained.

It was thought that the Gold Reckoning Tables that have so long done service might be superseded by some more generally useful information, and in their place has been substituted a Directory of the Public Officials and Institutions of the larger towns To the many correspondents who have furnished the details now given the best thanks of the Publishers are due.

The contents of the Almanac throughout have been carefully revised, and every effort made to secure accuracy in all the information here printed.

The Publishers have much pleasure in gratefully acknowledging the support that has been received from advertisers, and the people generally of Queensland.

ROYAL
INSURANCE COMPANY,
FIRE & LIFE.

Capital - - £2,000,000 Sterling.

WITH UNLIMITED LIABILITY.

FIRE DEPARTMENT.

Net Premiums for the year 1875 - - £742,553 0 0
Losses - - - - - - - 355,161 12 8

Policies issued in Brisbane at Current Rates. Losses promptly settled by the undersigned.

LIFE DEPARTMENT.

Income for 1875 from premiums, after deducting re-assurances, £240,963 14s.

The recent report issued by the Board of Trade shews that of all the English Provincial Life Offices, and of all the Scotch Offices the ROYAL'S ratio of expense to its premium income is "absolutely the lowest," and the tests laid down by the Board of Trade as requisites of a sound and prosperous Company are shewn to be entirely satisfied by the ROYAL.

FUNDS.

After providing for payment of Dividend and Bonuses the Funds of the Company on 31st December, 1875, stood as follows :—

Capital paid up - - -	£289,545 0 0
Fire Fund - - - -	400,000 0 0
Reserve and Profit and Loss -	592,745 19 0
Life Funds - - - -	1,976,146 11 9
Total - -	£3,258,437 10 9

12th to 16th day	From 7 p.m. till daylight	From 7 p.m. until daylight.
16th to 23rd day	From 9 p.m. till daylight	From 9 p.m. till daylight.
23rd to 29th day	From 1 a.m. till daylight	From 1 a.m. till daylight.

RULES FOR FORETELLING THE WEATHER ACCORDING TO THE RISE AND FALL OF THE BAROMETER.

THE BAROMETER RISES

For Southerly Wind (including from South-west by the South to the Eastward).

For Dry or Less Wet Weather (if Very Wet Weather has been prevalent) for less wind, or for more than one of these changes, *except* on a few occasions when Rain comes from the Southward with strong wind.

THE BAROMETER FALLS

For Northerly Wind (including from North-east by the North to the Westward).

For Wet Weather in Winter, for strong wind in Summer, or for more than one of these changes.

Except on a few occasions when moderate wind with rain comes from the Southward.

The Chinese Civil year is Lunar, consisting of 12 months of 29 days and 30 days alternately. Every three years a thirteenth month has to be added, or rather, in every nineteen years there are seven years which have thirteen months. Even this contains some error; they have therefore formed a cycle of 60 years, in which period 22 intercalary months occur.

The Japanese year is divided into twelve months, distinguished by the twelve signs of the zodiac, which are named after twelve animals; these twelve months vary in length year by year, and the Mikado or Sacred Emperor arranges the number of the intercalary days and the months to which they are to be added.

1st Month.] **JANUARY.** [31 Days.

JANUARY corresponds to July in Great Britain. It is usually one of the hottest months in the year, and is marked by frequent thunderstorms.

METEOROLOGICAL OBSERVATIONS, JANUARY, 1877.—The weather was slightly warmer than usual; the mean shade temperature, 78·6, being 0·4 over the average of this month for the previous ten years, but 0·8 under the previous three years. The highest reading in shade, 104·0 was on the 17th; the lowest on grass, 60·0, was on the morning of the 16th. The mean barometric reading, 29·914 was 0·008 above the average of the month: the highest, 30·130, was at 9 p.m. on the 28th, and the lowest, 29·592, at 3 p.m. on the 17th. Rain fell on 14 days; the total fall, 6·90 inches, being 0·19 inches under the average of the month for the previous ten years; the maximum fall during 24 hours, 1·90 inches, was on the 22nd. The total rainfall of the year 1877, up to 31st January, was 6·90 inches, on 14 days.

NOTES OF THE MONTH.

January is named after the two faced Roman deity Janus, to whom the Romans presented on the first of this month the Janual, an offering consisting of wine and fruits. On the same day the image of the god was crowned with laurel, the consul ascended in solemn procession to the capitol, and small presents were made to one another by friends. The month was added to the calendar along with February by the Emperor Numa. It was not until the eighteenth century that it was generally adopted by European nations as the first month of the year, although the Romans considered it as such, as far back as 251 B.C.

1—*Circumcision.* This feast, one of the latest introduced into the calendar, was instituted to commemorate the Saviour's obedience to the ceremonial law, on the eighth day after the nativity.

6—*Epiphany* commemorates the manifestation of Christ to the Gentiles, when the Magi, following the star, found the infant Saviour in the manger, and offered gifts. Twelfth Day is a festival in many parts, for which twelfth cakes are prepared. According to the old style, this was Christmas Day.

9—The Emperor Napoleon III., after many vicissitudes, expired at Chislehurst, after an operation which, to all appearance, had been successful, At one time a special constable, afterwards a confinee at Ham, he rose to be President of the French, and, ultimately, their Emperor.

16—The battle of Corunna was fought between the British troops, under Sir John Moore, and the French, under Marshal Soult, resulting in the repulse of the French and the death of the English commander. The British troops numbered 14,000 men against 20,000 of the French.

25—Saul, afterwards Paul, is distinguished as the Apostle to the Gentiles. He was miraculously arrested when on his way to Damascus, and thenceforward, became the propagator of the gospel he had endeavoured to destroy. He is supposed to have visited the British Isles in the course of his missionary labours. He is believed to have suffered martyrdom in company with Peter at Rome.

26—The anniversary of the birth-day of Australia, when the colony of N. S. Wales was founded.

FEBRUARY corresponds to August in Great Britain; the weather is generally excessively hot and sultry with a humid atmosphere.

METEOROLOGICAL OBSERVATIONS, FEBRUARY, 1877.—Weather warmer than usual during the month; the mean shade temperature, 78·0 being 0·9 over the average of this month for the previous ten years, and 1·3 over the previous three years. The highest reading in shade, 94·0, was on the 1st; the lowest on grass, 58·0, was on the morning of the 4th. The mean barometric reading, 30·053, was 0·176 above the average of the month: the highest, 30·194 inches, was at 9 p.m. on the 14th, and the lowest, 29·837 inches, at 3 p.m. on the 2nd. Rain fell on 7 days; the total fall, 1·68 inches, being 6·46 inches under the average of the previous ten years. The greatest fall in 24 hours, 1·05 inches, was on the 2nd. The total rainfall of the year 1877, up to 28th February, was 8·58 inches, on 21 days.

NOTES OF THE MONTH.

February so named because the Februalia (from februare to expiate or purify) a feast of purification and expiation, was celebrated in Rome during this month. Numa added it to the end of the year, and for this reason some have supposed that it derives its name from an old Latin word, Fibar, meaning the end or extremity of anything. The Decemvirs placed it after January—452 B.C. Its Saxon name was Sol. Monatt.

1—The feast of St. Bridget (Patroness of Ireland); from her the term Bride is derived.

2—*Purification.*—This feast commemorates the presentation of Christ in the Temple, and is usually known as the Purification of the Virgin Mary.

5—Battle of Plassey, 1757. Clive with about 3000 troops defeated Surajah Dowlah with 60,000, and established British supremacy in India.

7—H.M.S. Orpheus, a screw corvette of 21 guns, and sister ship to the Wolverine, now on the Australian station, was totally wrecked at the entrance of Manukau Harbour, a few miles from Auckland.

14—St. Valentine, a bishop of the early Christian Church, who was put to death A.D. 270. The day is now honored by the passing of love missives. Much respected by valentine sellers, and cordially hated by postmen all the world over..

17—Septuagesima and the two following Sundays, Sexagesima and Quinquagesima, are preparatory to the season of Lent, and their place in the calendar is indicated by their being respectively seventy, sixty, and fifty days before Easter.

20—Governor Bligh is famous in history from the mutiny of the ship Bounty. The mutineers, the progenitors of the Pitcairn Islanders, after seizing the vessel, sent Lieutenant Bligh and a portion of the crew adrift in an open boat. After many hardships they ultimately reached the land in safety, mainly through the skill of their commander. He was afterwards appointed to the Governorship of N.S. Wales, where again his subordinates rose against him and deprived him of his office.

22—Washington, the founder of American independence and first President of the United States, was born on Feb. 22, 1731, at Bridge's Creek, Virginia.

24—St. Matthias, one of the seventy-two disciples, was, after the suicide of Judas Iscariot, chosen to be one of the twelve. His fate is doubtful, by some he is stated to have died at Sebastopolis, by others that he met a martyr's death by stoning in Judea.

MARCH corresponds to September in Great Britain, and begins to show a pleasant decrease in the temperature.

METEOROLOGICAL OBSERVATIONS, MARCH, 1877.—The weather was cooler than usual; the mean shade temperature, 74·6, being 0·3 under the average of this month for the previous ten years, and 1·6 under the previous three years. The highest reading in shade, 95·0, was on the 3rd; lowest on grass, 62·0, was on the morning of the 14th. The mean barometric reading, 30·103 inches, was ·109 inches above the average of the month: the highest, 30·228, was at 9 p.m. on the 22nd, and the lowest, 29·879, at 3 p.m. on the 2nd. Rain fell on 19 days; the total fall, 3·02 inches, being 5·35 inches under the average of the month for ten years, and 1·77 inches under the previous three years. The greatest fall in 24 hours, 0·76 inches, was on the 25th. The total rainfall of the year 1877, to 31st March, was 11·60 inches, on 40 days.

NOTES OF THE MONTH.

March, Latin Martius, derives its name from Mars, the god of war, the reputed father of Romulus. By the Saxons it was named Rhedi-monat or Rugged-month. March was the first month of the year in the old Roman calendar, and was so considered in England until the change of style in 1752, the English legal year being reckoned from the 25th of that month.

1—The day of St. David, the patron saint of the Welsh. He was bishop of Menevia, where he died about the year 544.

2—The Rev. John Wesley was the founder of the society called Methodists. He was a clergyman of the Church of England, and some time fellow of Lincoln College, Oxford. Though practically excommunicated by the clerical authorities of the day, who disapproved of his energetic methods of evangelisation, he was a lover of the Church, and testified in his last moments that he died in Her fold.

5—*Shrove Tide* takes its title from the old practice in Roman Catholic times, of people being shriven or shrove, that is, of confessing sins and receiving absolution before the Lenten fast on this day.

12—The day of St. Gregory, consecrated pope A.D. 590. He paid great attention to the study of Books and Music, whence the term "Gregorian" is derived. He sent Augustine to the British Isles, to Christianise the natives.

17—St. Patrick. A day generally kept as a holiday. St. Patrick being, as is well known, the tutelar saint of Irishmen. He is supposed to have been born at Dumbarton, in Scotland. He died in 432, at the advanced age of 123, and was buried in the Cathedral Church of Down.

22—The celebrated German author and poet, Goethe, was born at Frankfort. His great work is "Faust." He died at Weimar.

25—*Annunciation.* This day is observed in commemoration of the visit of the angel Gabriel to the Virgin Mary, when it was revealed to her that she should be the mother of the promised Saviour. It is known as Lady-day.

APRIL corresponds to October in Great Britain; cool weather is now setting in, and nights are frequently chilly.

METEOROLOGICAL OBSERVATIONS, APRIL, 1877.—The weather was colder than usual during the month; the mean shade temperature, 70·1, being 0·8 under the average of this month for the previous ten years, and 1·8 under the previous three years. The highest readings in shade, 88·5, was on the 10th; the lowest on grass, 43·0, was on the morning of the 28th. The highest barometric reading, 30·326, was at 9 p.m. on the 14th, and the lowest, 29·771, at 8 p.m. on the 30th. The mean barometric reading, 30·116, was ·059 inches above the average of the month for the previous nine years. Rain fell on 14 days: the total fall, 2·23 inches, being 3·27 inches under the average of the month for the previous ten years, and 2·15 inches under the previous three years. The greatest fall in 24 hours, 1·01, inches was on the 28th. The total amount of rain which fell in the year 1877 up to April 30th was 13·83 inches on 54 days.

NOTES OF THE MONTH.

April, Latin Aprilis, from aperire, to open, so called because it was the season in the old world when the buds began to open. The month was dedicated to Aprodite Venus, the goddess of all budding beauties.

1—*All Fools' Day.* A day when practical jokes, frequently of a stupid and mischievous character are supposed to be licensed. The custom is believed to be of very ancient origin, and is said by some to have been derived by the Romans from some of the eastern nations.

4—Leichhardt started on his fatal journey in October, 1847. A letter, dated April 4, 1848, was received from him, since which the silence and darkness of the grave have shrouded him.

14—*Palm Sunday* is observed by the Church in remembrance of Christ's triumphal entry into Jerusalem. In some of the churches in England, branches are gathered and placed in honor of the day.

18—*Maunday Thursday, Dies Mandati.* Day of command, from Christ commanding his disciples to love one another when he washed their feet on the night preceding his crucifixion.

18—Gray was a member of the ill-fated Burke and Wills expedition. It left Melbourne, August 20, 1860, provided with every possible requirement for its journey. Leaving the bulk of the party at Cooper's Creek, Burke, Wills, Gray, and King, successfully crossed the continent to the tidal waters of the Gulf. Their return was a series of hardships and misadventures, culminating in the entire party, with the exception of King, who was kindly treated by the natives, perishing from starvation.

19—*Good Friday.* The origin of eating hot cross buns is not known, but it is believed to be a relic of Pagan days.

21—*Easter Sunday*, or Easter Day (derived from the Saxon oster, to rise) is the festival of the Church of England, kept as the anniversary of the Resurrection. Easter Day, which is the first Sunday after the full moon occurring after March 21, fixes the dates of all moveable fasts and feasts. It is late this year; in 1867 it happened on the same date, but it will not again be so late till 1886.

23—*St. George* was born in Epiphania; died, 303.

MAY corresponds to November in Great Britain. The Queensland winter may now be considered as having begun. Weather generally cool and enjoyable.

METEOROLOGICAL OBSERVATIONS, MAY, 1877.—The weather was slightly warmer than usual during the month; the mean shade temperature, 66·7, being 1·0 over the average of this month for the previous ten years, and 1·4 over the previous three years. The highest reading in shade, 86·5, was on the 23rd; the lowest on grass, 40·0, was on the morning of the 29th. The highest barometric reading, 30·308, was at 9 p.m. on the 31st, and the lowest, 29·598, at 3 p.m. on the 2nd. The mean barometric reading, 29·956 inches, was 0·128 inches below the average of the month. Rain fell on 5 days; the total fall, 1·08 inches, being 2·53 inches under the average of the month for the previous ten years, and 5·98 inches under the previous three years. The greatest fall in 24 hours, 0·57 inches, was on the 14th. The total amount of rain which fell in the year 1877, up to 31st May, was 14·91 on 59 days.

NOTES OF THE MONTH.

May, Latin Maius, from a word which signifies to grow. The advent of this month marking the return of spring was generally hailed as a season of joy and gladness, and among the Romans this feeling found vent in the Floral Games, held on the fourth of the Calends of May. In England during the Middle ages it was customary on the first of May—May-day—for both high and low to go out and gather fresh flowers, and May Games were popular in England, France and Germany. The institution of the May pole is believed to date from the Roman Floralia. At one time they were universal on the village greens of England. In April, 1718, a famous May pole was to be seen in the Strand, London. It has also been stated that this month was named in honor of Maia, the mother of Mercury, but it was called Maius before the Romans knew of Mercury. The Saxons called it Tri-milchi, from the abundance of milk at this period.

1—St. Philip and St. James.—St. Philip is believed to have preached in Phrygia, and probably died there. St. James was one of the sons of Zebedee and second cousin to the Saviour. He was the first bishop of Jerusalem, and suffered martyrdom at the hands of the Jews.

3—Commemorates the Feast of "The Invention of the Cross." The cross on which the Saviour died is said to have been discovered in 326 by the Empress Helena, the mother of Constantine I. Three crosses were found on digging beneath the surface of Mount Calvary, and the identity of the true one was manifested by a corpse coming to life so soon as it came in contact with it.

10—The battle of Lodi took place at the bridge over the Adda, at Lodi, between the French and the Austrians: the latter, after a severe struggle, being defeated. Napoleon Buonaparte showed distinguished bravery on this occasion.

26—*Rogation Sunday.*—This term is derived from the Latin verb Rogare, to beseech—special prayers being appointed as a preparation for the observance of the Ascension.

JUNE corresponds to December in Great Britain; weather generally cool, with fine clear nights and sometimes heavy dewfall.

METEOROLOGIAL OBSERVATIONS, JUNE, 1877.—The weather was warmer than usual; the mean shade temperature, 61·6, being 0.8 above the average of this month for the previous ten years, and 1·7 above the previous three years. The highest reading in shade, 84·5, was on the 22nd; the lowest on grass, 39·0, was on the morning of the 14th. The highest barometric reading, 30·499, was at 9 a.m. on the 4th, and the lowest, 30·014, at 3 p.m. on the 13th. The mean barometric reading, 30·299 inches, was 0·184 inches above the average of the last nine years. Rain fell on 9 days; the total fall, 1·36 inches, being 2·76 inches under the average of the month for the last ten years. The greatest fall in 24 hours, 0·44 inches, was on the 11th. The total amount which fell during the year 1877, up to 30th June, was 16·27 inches on 68 days.

NOTES OF THE MONTH.

June—there are various suppositions respecting the origin of the name of this month. It is variously derived from juniores, the young men, to whom Romulus is said to have assigned it; from Junius Brutus, the first consul; from jungo, to join, with reference to the union of the Romans and Sabines; from the Latin Junius, for Junonius; from Juno, because it was sacred to the Goddess. It was the fourth month in the Roman calendar, but Numa Pompilius gave it the sixth place, which it has since retained.

1—*St. Nicomede*, said to have been a disciple of St. Peter. He was scourged to death, A.D. 90.

5—*St. Boniface* was born in Devonshire, about the year 680. He was the first Archbishop of Mayence in 745, and suffered martyrdom at Utrecht.

9—Whitsuntide commemorates the day of Pentecost, when the Holy Ghost fell upon the Apostles. It is supposed to take its name from the circumstance that in the primitive church the newly baptised appeared at worship between Easter and Pentecost in white garments.

11—*St. Barnabas*, otherwise Joses, the son of consolation, laboured many years with St. Paul; but "dissensions arose between them," and they parted, St. Barnabas choosing Cyprus as his mission field. He was stoned at Salamis.

18—The anniversary of the Battle of Waterloo. It commenced at half-past 11 on Sunday morning, the British and German troops, under the Duke of Welington, numbering 67,661 with 156 guns; the French, under Napoleon Bonaparte, were 68,900 men, with 246 guns. After sustaining the repeated attacks of the French troops, the allied troops assumed the offensive towards sunset, the whole of the line advancing, occasioning a panic and general flight of the French. The allied forces lost 22,000 men, and the French 40,000, while the results of the battle were of the highest moment.

19 (or 15)—Magna Charta, the great charter of English liberty, was extorted from King John by the Barons. This important document was signed and sealed at Runnymede, a field between Staines and Windsor.

JULY corresponds to January in Great Britain, and like it, is the coldest month of the year, though the sun has considerable power in the middle of the day.

METEOROLOGICAL OBSERVATIONS, JULY, 1877.—The weather was warmer than usual during the month, the mean shade temperature, 60·4, being 1·8 over the average of this month for the past ten years, and 1·2 over the previous three years. The highest reading in shade, 77·5, was on the 17th; the lowest on grass, 38·0, was on the morning of the 18th. The mean barometric reading, 30·217 inches, was ·078 inches above the average of the month; the highest, 30·566, was at 9 p.m. on the 3rd, and the lowest, 29·794, at 3 p.m. on the 16th. Rain fell on 11 days; the total fall, 1·52 inches, being 2·35 inches over the average of the month for the previous ten years; the greatest fall in 24 hours, 0·41 inches, was on the 6th. The total amount of rain fall during the year 1877, to July 31st, was 17·79 inches on 79 days.

NOTES OF THE MONTH.

July, originally called Quintilis, the fifth, because it was the fifth month in the old Roman calendar, (March being the first month,) was named Julius in honor of Julius Cæsar who was born on the 12th of the month.

1—Separation day is observed as a holiday in Melbourne, being the anniversary of the day on which Victoria became independent of New South Wales.

2—Battle of the Boyne was fought on the banks of the River Boyne, near Oldridge. The troops under William III. completely defeating those of James II.; the latter fled to France, and ended his days in comparative obscurity.

3—The battle of Sadowa was fought between the Prussians, under King William I. of Germany, and the Austrians, under Field-Marshal Benedek. The contest lasted all day, the Austrians being eventually defeated, losing 160 guns, 14 stand of colours, and 15,000 prisoners, besides a fearful list of killed and wounded. The Prussian victory was due, in a great measure, to the superiority of the needle gun.

4—A day of honor among Americans, when the celebrated charter of independence was promulgated. It was issued by the Second Congress of Delegates from the twelve colonies, who met at Philadelphia, on May 10, 1775. The Centennial was celebrated at Philadelphia, in 1876, by a great exhibition of the manufactures and productions of all nations, at which the colony of Queensland was well represented, and took some of the leading honors.

15—*St. Swithin's Day.* In the country districts of England supposed to be the christening day of the apple. It is still a superstition there that if it rains on this day it will rain for forty days.

26—*St. Anne*, the daughter of Matthew, the priest, and Mary, his wife, and the mother of the Virgin Mary.

30—It was on this (his first) voyage that Captain Cook discovered Botany Bay, and took formal possession of the country under the name of New South Wales.

AUGUST corresponds to February in Great Britain, is for the most part cold, but towards the end a rise in the temperature may be noticed. In England it is the harvest month.

METEOROLOGICAL OBSERVATIONS, AUGUST, 1877.—Weather warmer than usual during the month; the mean shade temperature, 63·5, being 2·4 over the average of the month for the previous ten years, and 2·0 over the previous three years. The highest reading in shade, 87·0, was on the 16th; the lowest on grass, 40·5, was on the morning of the 27th. The highest barometric reading, 30·486 inches, was at 9 a.m. on the 8th, and the lowest, 29,900 inches, at 3 p.m. on the 25th; the mean barometric reading was ·082 higher than the average of the month. Rain fell on 5 days; the total fall, 0·31 inches, being 0·57 inches under the average of the month; the greatest fall in 24 hours, 0·21 inches, was on the 29th.

NOTES OF THE MONTH.

August, originally styled Sextilis, received its present name from the Emperor Augustus, on account of several of the most fortunate events of his life having occurred during this month. Before his time it was called Sextilis, being the sixth month of the year according to the old Roman Calendar.

6—Transfiguration.—This festival commemorates the Transfiguration of Christ on Mount Tabor. It was instituted by the Greek Christians in the year 700, and was introduced into the Roman Calendar in 1455.

13—The Battle of Blenheim was fought at Blenheim, about 20 miles from Augsburgh. The allied army under Marlborough and Eugene completely defeated the French and Bavarian forces, the loss of the latter being 12,000 killed, 13,000 prisoners, 100 guns, 24 mortars, 129 colors, and 171 standards.

21—The Battle of Vimiera was fought in the Peninsula. The French troops under General Junot attacked the British forces under Sir Arthur Wellesley, but were repulsed with a loss of 14 guns and many prisoners.

24—St Bartholomew—supposed to be the disciple Nathaniel, "in whom there was no guile." He preached throughout Armenia and India, and suffered martyrdom in Armenia by being flayed alive.—It is the anniversary of the dreadful massacre of the Huguenots, which took place on the evening of August 24, 1572, Admiral Coligny was the first victim, and it is estimated that at least 30,000 persons were murdered in cold blood, throughout France.

28—St. Augustine was an African, and was converted to Christianity through hearing a sermon by St. Ambrose at Milan. He became bishop of Hippo, in Africa, and died there in 430 at the age of 77. His mother, Monica, ranks high among Christian women.

31—John Bunyan, the author of the "Pilgrim's Progress," was born at Elstow, near Bedford. His masterpiece was composed in Bedford jail, long since swept away. He died at a house on Snow Hill, London, and lies in Bunhill Fields burial ground.

SEPTEMBER corresponds to March in Great Britain, and may be considered a herald of spring.

METEOROLOGICAL OBSERVATIONS, SEPTEMBER, 1876.—Weather warmer than usual during the month; the mean shade temperature, 66·7, being 0·9 over the average of the month for the previous ten years, and 0·7 over the previous three years. The highest reading in shade, 88·0, was on the 15th; the lowest on grass, 39·0, was on the morning of the 14th. The highest barometric reading, 30·418 inches, was at 9 a.m. on the 19th, and the lowest, 29·556 inches, at 3 p.m. on the 11th; the mean barometric readings were about the average of the month. Rain fell on 9 days; the total fall, 2·32 inches, being 1·07 inches over the average of the month for the previous ten years; the greatest fall in 24 honrs, 1·01 inches, was on the 29th. The total rainfall for the year 1876, to September 30th, was 44·22 inches, on 102 days.

NOTES OF THE MONTH.

September, from the Latin Septem, seven, derives its name from having been the seventh month in the old Roman calendar. The Saxons called it Gerstmonat, from Gerst-barley, as that cereal in their time would be ripe for the sickle.

1—Partridge shooting begins in England.

2—The great fire of London broke out on a Sunday morning, at a baker's shop in Pudding Lane. It raged for several days; consuming the greater part of the city, including 13,000 houses, 89 churches, among them the Gothic Cathedral of St. Paul's, the predecessor of the present Italian structure, and property valued at upwards of ten millions. A Papist, named Hubert, was hanged on his own confession as having been the incendiary, but the fire is believed to have been accidental.

3—The anniversary of the day when Cromwell died, also the day on which some of his greatest successes were obtained, notably the battle of Worcester, where the forces under Charles II. were completely defeated; and the battle of Dunbar.

7—The Captain was the pioneer of the turret class class of ironclads designed by Captain Coles, who was on board of her when she sank. The principle of her construction was stated to be dangerous some time before, by Mr. Reed, the late Constructor to the navy.

9—The battle of Flodden Field was fought between the Scottish forces, 50,000 strong, under James IV., King of Scotland, and an English army of 24,000 men, under the Earl of Surrey. The Scotch were totally defeated, and their king slain.

11—Lord Cornwallis defeated at Brandywine in Pennsylvania, an American force considerably outnumbering his own.

19—The Royal George was a line of battle ship of 108 guns, commanded by Admiral Kempenfelt. She was careened for repairs, and suddenly upset, nearly 900 men, including her commander, were lost. Her guns and other materials have been recovered by divers.

29—*Michaelmas Day.* The third quarter day of the year; also, the feast of St. Michael and all angels.

30—*St. Jerome*, one of the early fathers. A voluminous writer and part translator of the Latin Vulgate, which he completed in 405. He died at an advanced age in the year 420.

OCTOBER corresponds to April in Great Britain; weather begins to be unpleasantly hot, with occasional thunder and sometimes heavy hail storms.

METEOROLOGIAL OBSERVATIONS, OCTOBER, 1876.—Weather warmer than usual during the month; the mean shade temperature, 72·6, being 1·5 over the average of the month for the previous ten years, and 1·3 over the previous three years. The highest reading in shade, 95·0, was on the 30th; the lowest on grass, 43·5, was on the morning of the 10th. The mean barometic readings about the average of the month: the highest, 30·188, was at 9 a.m. on the 1st, and the lowest, 29·700, at 3 p.m. on the 13th. Rain (which varies much in quantity during this month) fell on 16 days; the total fall, 3·21 inches, being 0·73 over the average of the month for the previous ten years; the greatest fall during 24 hours, 0·98 inches, was on the 18th. The total rainfall for the year 1876, to 31st October, was 47·43 inches on 118 days.

NOTES OF THE MONTH.

October also takes its name from the Latin number Octo, eight, being the eighth month in the old Roman calendar.

4—The first Bible printed in London was in Latin. The first Bible printed in England by authority was in 1535, and is known as the Great (or Cromwell's) Bible.

9—*St. Denis* is the patron saint of France. He was beheaded on the heights of Montmartre, and is reported to have performed the unprecedented feat of carrying his own head in his arms for a distance of two miles. He was buried at St. Denis in the year 272.

18—*St. Luke.* The "beloved physician" was the author of the gospel bearing his name, and also of the book of the Acts of the Apostles. He is said to have preached in Egypt and Greece, and to have suffered martyrdom by hanging from an olive tree, at the age of 84.

22—The naval battle of Trafalgar was fought between the British and the combined French and Spanish fleets. The former numbered 37 vessels in all; the latter, 38, including five frigates. Nineteen of the enemy surrendered, and one was sunk. The victory was dearly purchased in the loss of Nelson, whose remains were brought to London, and honored with a public funeral. He lies in the crypt of St. Paul's, within a few feet of the Duke of Wellington.

25—St. Crispin, the patron saint of cordwainers.

27—The anniversary of the birthday of Captain Cook, the practical discoverer of Australia. The ship, the "Brotherly Love," in which he served some time is still afloat, and trading as a collier. Captain Cook was killed by the natives of Owhyhee, on February 14, 1779, on his second voyage to the Sandwich islands.

28—*St. Simon* and *St. Jude* are associated together. The former was martyred by being sawn asunder; of the latter, the author of the epistle bearing his name, little is known.

31—*All Hallows' Eve.* The eve of the festival of All Saints was in many parts formerly celebrated by festive gatherings.

NOVEMBER corresponds to May in Great Britain. Summer has now fairly set in, and the heat begins to be oppressive; though the nights on elevated positions are cool and pleasant.

METEOROLOGICAL OBSERVATIONS, NOVEMBER, 1876.—Weather much warmer than usual during the month; the mean shade temperature, 78·8, being 4·2 over the average of the month for the previous ten years, and 3·8 over the previous three years, and the highest mean temperature for this month on record. The highest reading in shade, 102·5, was on the 6th; the lowest on grass, 51·0, was on the morning of the 27th. The mean barometric readings were over the average of the month: the highest, 30·150, was at 9 a.m. on the 30th, and the lowest, 29·571, at 3 p.m. on the 19th. Rain (which varies much in quantity during this month) fell on six days; the total fall, 2·23 inches, being 1·52 inches under the average of the previous ten years; the greatest fall during 24 hours, 0·84 inches, was on the 16th. The total rainfall for the year 1876, up to November 30th, was 49·66 inches on 124 days.

NOTES OF THE MONTH.

November was the ninth month in the old Roman calendar, and takes its name from the Latin Novum, nine. The Saxons styled it Wind-monat, or Wind-month, and Blot-monat, or Blood-month, because at this time they killed their oxen, sheep, and pigs, for salting for the winter.

1—*All Saints' Day.* This festival was instituted in 610, when the Roman Pantheon was consecrated as a Christian Church. It commemorates all the saints of the Church to whom no special days are allotted.

2—*All Souls Day.* A kept day of the Romish Church when the faithful dead are held in remembrance, and special prayer is made for the souls supposed to be undergoing the cleansing fires of purgatory. In many parts of Europe it is the custom on this day, to place immortelles and wreaths of flowers on the graves of departed friends.

11—*St. Martin* was the Bishop of Tours; he founded a monastery at Poictiers, and died in the year 397. The invocation *O, Mihi, beate Martini*, is said to be the origin of the expression "All my eye and Betty Martin." Martinmas is one of the Scottish quarter days.

26—Cowper was born at Berkhampstead in Hertfordshire. He passed great portion of his life, and composed his principal poems, at Olney, where his residence and summer house are still to be seen. A mental affliction, bordering on insanity, clouded much of his life.

27—Oliver Goldsmith, the author of the "Vicar of Wakefield," and of the "Deserted Village," and many other poems, a contemporary and associate of Dr. Johnson. After a chequered career, "poor Nolly" died in London. He lies in the churchyard of Temple Church, Fleet-street, but the spot is unmarked, and is not even known.

30—*St. Andrew's Day.* So named in honor of St. Andrew, the patron saint of Scotland. He was a follower of John the Baptist, and afterwards became a disciple of Christ. He is believed to have suffered martyrdom by crucifixion, at Patra, in Greece, in the year 70.

DECEMBER corresponds to June in Great Britain. It is a month usually of fierce sunshine and cloudless skies; the nights are sometimes pleasantly cool.

METEOROLOGICAL OBSERVATIONS, DECEMBER, 1876.—Weather much warmer than usual during the month; the mean shade temperature, 79·5, being 1·2 over the average of the month of the previous ten years, and 1·5 over the average of the previous three years. The highest reading in shade, 108, was on the 16th; the lowest on grass, 53·0, was on the morning of the 1st. The mean barometric readings were about the average of the month: the highest, 30·189, was at 9 p.m. on the 18th, and the lowest, 29·648, at 3 p.m. on the 27th. Rain fell on six days; the total fall, 3·76 inches, being 2·01 inches under the average of the previous ten years; the greatest fall during 24 hours, 2·39 inches, was on the 23rd. The total rainfall for the year 1876, was 53·42 inches on 130 days. The month opened with warm, seasonable weather, but soon became extremely warm from the 8th to the 23rd, the temperature was much above the average, reaching to 108 in the shade on the 16th, being the second time such extreme heat was recorded during fifteen years; the latter part of the month was cool.

NOTES OF THE MONTH.

December, the last month of the present chronological year, was the tenth month of the old Roman calendar, and takes its name from the Latin Decem, ten. The Druids at this time celebrated their great feast of Thor. By the Saxons it was styled Winter-monat, or Winter-month, and also Halig-monat, or Holy-month, in remembrance of the birth of Christ.

1—*Advent Sunday.* The beginning of the Ecclesiastical year. It is always the Sunday nearest either before or after St. Andrew's Day. It is a season consecrated by the Church in commemoration of, and as preparatory to, the coming of Christ. Its date of establishment is unknown, but it is believed to be prior to the year 450.

2—The battle of Austerlitz was one of the decisive victories of Napoleon. The French army numbered 90,000, and the Austrians and Russians, under the Emperors Francis II. and Alexander I., 80,000, who were defeated with great loss.

26—The seige of Kars lasted some months, and famine alone compelled the capitulation. It was restored to the Turks by the Treaty of Paris. It has again undergone a siege, but with a different result, the Russians being compelled to retire.

25—*Christmas Day* celebrates the birthday of Jesus Christ. The festival was instituted, it is believed, in the second century, though it is held by some authorities that April 5 is nearer the correct date.

31—The last day of the year. The custom of observing the closing hours of the year by divine service, originating with John Wesley in what he called the "Watchnight Service," is now becoming very general with all denominations. The fact that with all "a year's march nearer home" has been accomplished, is one that can hardly fail to give rise to serious thought. We know not what the coming year may bring forth.

From this Table the time of High Water on any day during 1878 for the Ports mentioned may be found.

RULE.—To or from the time of High Water at Brisbane Bar for the given day (to be found in the Calendar on previous pages) add or substract the constant (tide interval).

EXAMPLE.—To find high water A.M. and P.M. at Wide Bay on March 1, 1878:—High Water at Brisbane Bar on that day is 8 a.m., and 8 23 p.m., subtract the constant for Wide Bay 1.35, and the result is 6 25 a.m., and 6 48 p.m.

THE COLONY OF QUEENSLAND.

THE Colony of Queensland, the youngest of the Australian dependencies—its separate existence dating only from December 10th, 1859—comprises the whole of the North-Eastern portion of the Continent of Australia, its boundaries being on the North the Gulf of Carpentaria, on the East the Pacific Ocean, on the West the Northern Territory of South Australia, the dividing line being the 141st meridian of longitude from the 29th to the 26th parallel, and thence the 138th meridian—and on the South the Colony of New South Wales. Its estimated area according to a corrected return is 669,520 square miles or 428,492,800 square acres, being about twelve times the size of England and Wales. Its extreme length from North to South is 1300 miles, its breadth 800 miles, the coast line being about 2550 miles.

Below will be found some of the principal statistics of the year 1876. Fuller information of the rise, progress, and present condition of the Colony will be found in the "Australian Handbook."

POPULATION.—The total population of Queensland according to the corrected returns of the census taken in May, 1876, is 173,283 persons, consisting of 105,009 males, and 68,274 females, this is exclusive of the aborigines, whom the enumerators found uncountable. Of the number of persons 26,953 are domiciled in Brisbane. In England there are 344 persons to each square mile; in Queensland 3.86 square miles of country are available for each one of the present population. There were 36,552 dwellings, from the tent and the shanty to the palatial residence of the Governor and the squatter. Residing in towns were 95,783 persons; in the country districts were located 77,500 people. The Chinese population is returned at 10,412. The employment and occupation of the people is thus stated:—In Government employ, from the Governor downwards, 3104; in the learned professions—clergy, law, medical and other professions, 1854; engaged in domestic duties, 87,012; servants, waiters and others engaged in personal offices, 8723; merchants, tradesmen, clerks and others, 3534; squatters, 1965; employed on stations, 8541; engaged in farming pursuits, 17,069; carriers, 5325; mechanics and artisans, 28,177, and labourers, 5123. Under the head of "Public burden" are 12 pensioners, 569 paupers, 357 lunatics, 348 prisoners. As regards education 110,726 can read and write, 13,819 can read only, 46,393 cannot read, and the educational attainments, if any, of 2345 could not be ascertained. The religion of the people is thus recorded:—Church of England, 61,962; Roman Catholic, 43,147; Presbyterian, 18,947; Lutheran, 12,174; Wesleyan and Primitive Methodist, 11,065; Mahommedan and Pagan, 10,047; Religion not stated, 5936; Baptist, 4344; Congregationalists, 5360; Hebrew, 427; other religions than these, 1674.

REVENUE—CUSTOMS—PUBLIC DEBT.—The total Revenue for the year ending June 30, 1877, was £1,443,285 5s. 2d., being an increase on the previous year of £154,907 17s. 3d. The amount of Customs Duties collected during the year was £533,394 0s. 6d., showing an increase of £38,683 12s. 1d. Other increases were—Excise, £2576 7s. 8d.; land revenue, £29,685 6s. 0d.; rent of land for pastoral purposes, £13,858 0s. 11d.; gold miners' rights and business licenses, £4373 5s. 6d.; electric telegraph, £4435 12s. 4d.; railway receipts, £43,579 19s. 8d.; licenses, £1222 15s. 4d.; and miscellaneous receipts, £16,172 5s. 5d. The Expenditure for the year was £1,368,866 17s. 6d., being in excess of that for the previous year by £53,934 16s. 6d. Including a Dr. balance of £43,823 6s. 9d. on July 1st, 1876, the consolidated revenue fund showed a surplus, on June 30, 1877, of £23,891 7s. 3d. The public debt of the Colony amounts to £6,954,586, the yearly interest on which is £346,669.

EXPORTS AND IMPORTS.—During 1876 the exports amounted to £3,740,259, the imports to £2,983,870. The principal exports were copper ore and smelted; gold, rum, sugar; tin—sand, ore, and smelted; wool, tallow, hides, and preserved meats. The rate per head of population of the imports was £17 4s. 7d.; of the exports it was £21 11s. 11½d.

RAILWAYS.—In the Southern, Western, and Northern Railways there were in all in September, 1877, 327 miles open. The receipts for the year ending December 30, 1876, were £173,722 11s. 0d.; the working expenses were £112,152 0s. 11d. There were carried during the year 182,041 passengers, and 66,478 tons of goods.

ELECTRIC TELEGRAPH.—On January 1st, 1877, 4708 miles of line with 6156 miles of wire were in operation, there being 120 stations employing 265 officers. The cash receipts during the year amounted to £29,684 17s. 11d, exclusive of messages to the value of £12,372 6s. on the public service.

EDUCATION.—There were on December 31st, 1876, 252 schools, employing 357 male and 332 female teachers; 33,000 scholars, the average attendance being 18,534. The total expenditure during the year 1876 was £73,131 10s.: the cost of education per head being £2 11s. 10d.

AGRICULTURE.—The extent of land under each description of crop in the colony during the year 1876, was as follows:—Wheat, 5703 acres: maize, 41,601 acres; barley, 680 acres; oats, 162 acres; rye, millet and sorghum, 268 acres; potatoes, 3926 acres; cotton, 573 acres; sugar-cane, 13,735 acres; arrowroot, 71 acres; tobacco, 127 acres; sown grasses for hay, 4642 acres; vines for wine making, 313 acres; for grapes for table, 175 acres; bananas, 348 acres; pine apples, 160 acres; other crops, 799 acres; gardens and orchards, 2599 acres. In nearly every instance an increased area was under tillage, the only decreases being cotton, 1101 acres, and arrowroot, 67 acres. The average yield of wheat from seven police districts, was 20 bushels 28 lbs. to the acre. The lowest return was from the Gympie district, 12 bushels; the highest from the Goodna district, 28 bushels 4 lbs. Stock returns were 130,289 horses, 1,985,807 horned cattle, 7,241,810 sheep, 53,023 pigs; being an increase on the previous year's returns of 8792 horses, 173,231 horned cattle, 14,036 sheep, and 6576 pigs. On February 28, 1877, there were in all 11,862 selections taken up, of the gross area of 4,658,251 acres, particularised thus—Homesteads, under the Act of 1868, 3036 selections of 69,614 acres agricultural, and 208,899 acres pastoral; Homesteads under the Acts of 1872—75, 1088 selections—27,576 acres agricultural, and 337,149 acres pastoral; Conditional purchases, 7228 selections—241,683 acres agricultural, 695,642 first class pastorial, and 2,666,319 acres second class pastoral; Pre-emptives, 510 selections—66,157 acres agricultural; 118,276 acres first class pastoral; and 226,958 acres second class pastoral. The survey fees in all amounted to £82,207 17s. 6d.; rents to £131,813 19s. 3d. cash, and £24,044 15s. land orders.

GOVERNMENT OF QUEENSLAND.

GOVERNOR AND COMMANDER-IN-CHIEF—His Excellency Sir Arthur Edward Kennedy.

His Excellency, educated at Trinity College, Dublin, entered the Army as Ensign in the 11th Regiment in 1827; Lieutenant 1832; Captain 68th Light Infantry, 1840; retired from the Army in 1848 to accept Civil employment; was selected (while serving in the Army) in 1846 to fill the office of County Inspector under the Board of Works; and served uninterruptedly during the Irish famine, as Inspector under Sir John Burgoyne's Relief Commissioner; and subsequently as Inspector of Poor Laws, till the office was abolished in 1851; appointed Governor of the "Gambia," and transferred to Sierra Leone in 1852; Consul-General of the adjoining Sherbro County, in 1854; and removed in the same year to the Government of Western Australia, administered the latter government without interruption till February 1862; created Companion of the Bath in 1862; appointed Governor of Vancouver's Island, November 1863; Governor of the West Africa Settlements, November 1867; created K.C.M.G. in 1871; appointed Governor of Hong Kong, 1872; assumed the Acting-Governorship of Queensland on April, 10, 1877, and the Governorship on July 20, 1877.

REGISTRATION OF BIRTHS, MARRIAGES, AND DEATHS.

Every Birth must be registered within sixty days, and every death within thirty days, next thereafter respectively; and neglect of this regulation renders the parties, whose duty it is to register, liable to a fine not exceeding £10. If sixty days have elapsed from the date of birth, the law requires the parent, or other person making the application to register such birth, to pay a fee of two shillings and sixpence, and to make a solemn declaration of the facts before a Justice of the Peace, prior to the registration. If possible in all cases the father or mother ought to sign as informant. If unable to write, let a mark be made. No Birth can be registered after three years have elapsed from the date thereof.

Every Minister who has celebrated a marriage shall, within one month thereafter, transmit (in accordance with the Act 28 Victoria No. 15) the original certificate to the Registrar of the District, and every Minister who shall fail to transmit the certificate to the District Registrar, shall be liable to a fine of not less than £10 and not exceeding £50. Marriages must be solemnized between the hours of 8 a.m. and 8 p.m. Persons under age must produce the authority of parents or guardians or the marriage cannot take place.

In every case of burial, the Minister or officiating person ought to receive from the undertaker or person having charge of the funeral, a certificate from the District Registrar, certifying the registration of the death—unless in the case of inquest, when a certificate from the Coroner or Magistrate holding the inquest will be sufficient; and if any dead body shall be buried without such certificate, the person who may bury the same, or perform any funeral or religious service for the burial, or who shall in any way dispose of the body, shall forthwith give notice of the facts to the District Registrar.

NAMES OF REGISTRARS.

The Registry District comes first and is followed by the name and residence of the Registrar.

BALONNE—John Boyle Tonson, St. George
BLACKALL AND TAMBO—Thomas John Sadlier, Tambo
BOWEN—Waldron Burrowes, Bowen
BRISBANE, EAST MORETON, AND OXLEY—The Registrar-General, Henry Jordan, and Deputy-Registrar-General, William Theophilus Blakeney, Brisbane

DISEASES IN SHEEP ACT OF 1867.

The following amended Scale of Charges has been fixed for the keeping and dressing of imported sheep whilst in quarantine in lieu of those published in the *Government Gazette* of September 12, 1868, viz. :—

KEEP AND SUSTENANCE.

	S.	D.
For every day or portion of a day, per sheep, at the port of Brisbane	0	6
At any other port, not exceeding	0	9

DRESSING.

	S.	D.
For the first and only sheep	10	0
For more than one, and not exceeding five, belonging to the same owner, per sheep ..	5	0
For more than five, and not exceeding ten, belonging to the same owner, per sheep ..	3	0
For more than ten, and not exceeding twenty, belonging to the same owner, per sheep ..	2	6
For over twenty belonging to the same owner, per sheep	1	6

INSPECTORS OF SLAUGHTER HOUSES.

The Sergeant or Senior Constable in the respective localities is the appointed Inspector of Slaughter Houses, and of Cattle intended for slaughter.

POSTAL AND TELEGRAPHIC INFORMATION.

All Letters, Packets, and Newspapers posted in Queensland that are required to be prepaid, must bear Queensland Postage Stamps.

LETTERS.

Town Letters delivered at the Post Office, or within the limits of the town where posted, not exceeding ½oz. .. .. 1d.
Every additional ½oz. or part .. .. 1d.
Country Letters not exceeding ½oz. .. .. 2d.
Every additional ½oz or part thereof .. 2d.
Letters or packets containing gold—
Not exceeding ½oz. .. .. .. 4d.
Every additional ½oz. or part thereof .. 4d.
Intercolonial Letters, that is, to any of the Australian Colonies—
Not exceeding ½oz. .. .. .. 2d.
Every additional ½oz. or part .. .. 2d.

Overland to Victoria and South Australia—
Not exceeding ½oz. .. .. .. 4d.
Every additional ½oz. or part thereof .. 4d.

Letters to Great Britain, via Southampton, or via California—
Not exceeding ½oz. .. .. .. 6d.
Every additional ½oz. or part .. .. 6d.

Via Brindisi—
Not exceeding ½oz. .. .. .. 8d.
Every additional ½oz. or part .. .. 8d.

The rates above mentioned for English mail letters, apply to both the Torres Straits and the P. and O. routes. Letters should be marked "VIA MELBOURNE," if to be sent that way, and "VIA CALIFORNIA," if to be sent by the Californian Mail, otherwise they will be forwarded by the Torres Straits Mail.

The late fee on letters is, Colonial or Intercolonial, 3d.; Foreign, 6d., to be paid by affixing to the letter the necessary postage stamps. Late letters can be posted on board the steamers up to the time of sailing.

Letters, packets, or newspapers can be registered by affixing a fourpenny stamp in addition to the proper postage; the letter must be handed to the Postmaster, who will give a receipt for it. The adoption of registration is strongly urged in all cases where money, notes, or packets of value are sent, as the precautions taken with these almost ensure their safe delivery.

TOWN DELIVERIES.—In Brisbane there are two daily at 9.15 a.m. and 2 p.m. In Ipswich two deliveries at 9 a.m. and 3.40 p.m. In Rockhampton one regular delivery at 2.30 p.m., and another at 9 a.m. when steamers with mails arrive before that hour. In Toowoomba two deliveries at 10 a.m. and 2 p.m. In Maryborough one regular delivery at 9 a.m. and one at a later hour when steamers arrive with mails from the South before 2 p.m. In Warwick one delivery at 9 a.m. In Gympie and Townsville one delivery.

POST OFFICE HOURS.—The Delivery Office is open from 9 a.m. to 6 p.m. daily, Sundays excepted.

The DEAD LETTER OFFICE is open from 10 a.m. to 4 p.m., except on Saturdays, when it is closed at 12 o'clock.

The OFFICE for REGISTRATION of LETTERS is open from 10 a.m. to 4 p.m.

GENERAL RULES.

Any letter or packet posted for the Colony, the Australian Colonies, and the United Kingdom, will, if a single rate of postage be affixed, be forwarded and charged on delivery with double the postage deficient; but if any letter or packet does not bear that amount of postage, it will be opened and returned to the sender.

Any letter or packet posted for transmission to British Colonies (excepting the Australian Colonies and New Zealand), and to Foreign Countries (a few places excepted), whether sent direct or through the United Kingdom, will invariably be opened and returned to the sender unless it bears the *full amount* of postage payable thereon.

Letters and packets, on being *re-directed*, are charged the same amount of postage, in addition to the original postage, as would be payable if such letter or packet were originally posted at the place of re-direction.

A postmaster may refuse to receive or transmit by post any letter, packet, or package of newspapers exceeding sixteen ounces in weight or of inconvenient form or dimensions, or containing, or reasonably suspected to contain, any article likely to injure the other contents of the mail bags or any person.

On General Holidays the Offices are only open from 9 a.m. to 10 a.m., and there is only one delivery by letter carrier.

UNCLAIMED LETTERS.

Letters, packets, and newspapers, if not claimed, are kept at the Post-office to which they are directed for a period of one month. If not claimed at the expiration of that time they are sent to the Dead Letter Office, and the letters are then advertised in the Government Gazette. Queensland letters (that is, letters posted within the Colony) if not claimed within one month from the date of such publication, are returned to the writer. Intercolonial letters (that is, letters posted in any of the Australian Colonies or New Zealand), if not claimed within three months from the date of such publication, are returned unopened to the colony from which they were received. British and foreign letters (that is, letters posted in the United Kingdom, or at any place beyond the Australian Colonies), if not claimed within twelve months from the date of such publication, are returned unopened to the Colony or Country from which they were received

PRIVATE LETTER BOXES.

These may be obtained on the following terms, viz :—

Without lock, £1 1s. per annum, payable half-yearly in advance.

With lock, £1 5s. per annum, payable in advance; and a deposit of 15s. when box is applied for, of which amount 10s. will be returned, when use of box is discontinued, provided the box is in good order and keys (triplicate) are given up complete. If the lock is rendered useless by loss of the keys or by any damage, the whole amount deposited will be forfeited. A new lock and keys will be supplied at any time, if required, on additional payment of 7s. 6d.

PRIVATE BAGS.

Settlers, upon Mail Routes, requiring the accommodation of a private bag, can obtain the same from either of the two Post Offices next to them upon payment (in advance) of a sum not exceeding Two Guineas per annum to the Postmaster, who has to make up the bag, subject to the following regulations viz :—

(1) The bag must be of leather, and provided at the cost of the person requiring it. (2) The Postmaster will close and seal securely before despatching it; and it must be returned in like manner, sealed with some seal, the impression of which is known by the Postmaster. (3) The bag may contain letters for

POSTAL INFORMATION—*Continued.*

all persons who give *written authorities* to the Postmaster to enclose them. The person paying for the private bag is responsible for the postage of all unpaid letters, and for the receipts for all those which may be registered.

NEWSPAPERS.

Newspapers are transmitted within the Colony, and to the neighboring Colonies, free of charge, if posted within seven days from the date of publication; if posted after that period, one penny each. Newspapers received from beyond the Colony, in monthly parts, are (when reposted) subject to a charge of 1d. for every number contained therein.

Postage on Newspapers to the United Kingdom, 1d.; or, via Brindisi, not exceeding 4 ozs., 2d.; every additional 4 ozs. or fraction, 2d.

Newspapers to be with or without a cover, open at both ends, but without enclosure, mark, or communication, other than the words "Newspaper only," the printed name, occupation, and address of the publisher or vendor, in addition to the name, occupation, and address of the person to whom sent, otherwise they will not be transmitted. Newspapers re-posted in the Colony must be prepaid 1d, each.

BOOK AND OTHER PACKETS.

Bankers' packets, containing notes, orders, cheques, pass-books, returns or other periodical statements; process of, or proceedings or pleadings in any Court, briefs, cases, and instructions for counsel, and their opinions thereon respectively, deeds, affidavits, policies of insurance, letters of attorney, depositions, or recognizances, patterns or samples of merchandise, having no intrinsic value, either unenclosed or enclosed in transparent bags, or in bags tied round the neck so as to be easily loosened and re-fastened; prices current and catalogues; vouchers, or returns, or copies of returns, made by or to any officer in the public service; scrip, pamphlets, maps, plans, specifications, music, photographs (on paper), magazines, reviews, placards, almanacs, prospectuses, paintings, engravings, printers' proofs, or periodical publications other than newspapers; printed or plain books, writing paper and envelopes, seeds in transparent bags or papers, tied so as to be easily loosened and re-fastened, not exceeding 16 oz. in weight, can be sent through the Post-office at the undermentioned rates :—

For Queensland—

Not exceeding 2 ozs.	1d.
Above 2 ozs. but under 4 ozs.	2d.
Above 4 ozs. „ 6	3d.
Above 6 ozs. „ 8	4d.
Every additional 2 ozs. or part thereof ..	1d.

For the United Kingdom, *(via* Southampton,) and Australian Colonies—

Not exceeding 1 oz.	1d.
Not exceeding 2 ozs.	2d.
Not exceeding 4 ozs.	4d.
Every additional 4 ozs. or part thereof ..	4d.

For the United Kingdom via Brindisi, within 1 oz., Fivepence; 2 ozs., Sixpence; 2 ozs. to 4 ozs., Sixpence; and each additional four ozs., Sixpence.

NOTE.—The books or packets must be in covers opened at the end or sides for inspection, have the contents legibly marked, must not exceed 3 lb. in weight nor the dimensions of two feet in length by one foot in width and depth, and must not contain any letter or writing save the address and the name and address of the sender. Packets in which these rules are infringed, or which are posted insufficiently stamped, will be returned to the sender, except in the case of the United Kingdom, where short postage will be charged and also a fine on delivery.

MONEY ORDERS.

MONEY ORDERS may be obtained between the hours of 10 a.m. and 3 p.m. (except on Saturdays, when the offices close at 12 o'clock), and made payable at any Money Order Office in the Colony, on payment of the following charges :—

QUEENSLAND.—For any sum not exceeding £2, threepence; above £2 but not exceeding £5, sixpence; above £5 but not exceeding £7, ninepence; above £7 but not exceeding £10, one shilling.

INTERCOLONIAL.—New South Wales, South Australia, Victoria, New Zealand, Tasmania, Western Australia.—For any sum not exceeding £5, one shilling; exceeding £5 and not exceeding £10, two shillings.

BRITISH.—At any Money Order Office in the United Kingdom.—For any sum not exceeding £2, one shilling; exceeding £2 and not exceeding £5, two shillings and sixpence; exceeding £5 and not exceeding £7, three shillings and sixpence; exceeding £7 and not exceeding £10, five shillings.

GERMANY.—Under £2, two shillings; under £5, five shillings; under £7, seven shillings; under £10, ten shillings.

No order will be issued for more than £10. Payment of a Money Order must be obtained before the end of the sixth calendar month after that in which it was issued.

Money Orders may be transmitted by Telegraph between any Money Order Office in Queensland, and between Queensland and any Money Order Office in New South Wales, Victoria, and South Australia having telegraphic communication, on payment of the usual telegraph charge for a message, in addition to the Money Order commission.

ELECTRIC TELEGRAPH.

The Telegraph Stations in Queensland are open to receive messages from 9 a.m. to 6 p.m. daily, Sundays excepted. On Sundays the officers are in attendance at 9 a.m. for the receipt and despatch of telegrams of urgent importance. On special occasions when messages may be received after office hours an additional charge of 50 per cent. on the ordinary charge is made. The following are the charges :—

Between any two stations in the Colony—

	s.	d.
Ten words (exclusive of name and address of sender and receiver)	1	0
Each additional word	0	1

To stations in New South Wales—

Ten words	2	0
Each additional word	0	2

To stations in Victoria—

Ten words	3	0
Each additional word	0	3

To stations in New Zealand—

Ten words (address and signature are counted as part of the message) ..	10	6
Each additional word	1	0

To stations in South Australia (exclusive of the Overland Line)—

	s.	d.
Ten words	3	0
Each additional word	0	3

To stations on Overland Line—

Ten words	13	0
Each additional word	1	0

To stations in Tasmania—

Ten words (only ten words are allowed free for address and signature) ..	8	0
Every additional word	0	9

To Stations in West Australia—(Rate not published in time for printing.)

Press messages are charged one-half the ordinary rates (except to the Colony of New Zealand), and are exempt from the additional charge for transmission after ordinary office hours.

ELECTRIC TELEGRAPH—*Continued.*

At country post towns, where no electric telegraph station is opened, postmasters have been appointed, receivers of messages, which they will forward for transmission to the nearest electric telegraph station by first post. Persons desirous of using this means of communication will hand their message to the postmaster, together with the cost of transmission, twopence for postage, and sixpence for the postmaster's fee. Message forms may be obtained on application to any such post-office, and the postmaster and station-master will furnish information as to the cost of transmission.

All messages will be held strictly confidential, and should be written in ink, in a legible manner, in plain language, on the proper form, and the address must contain all information necessary to avoid delay and ensure delivery, and must be signed by the sender in words as well as in figures.

Payment of all charges in advance will be required, except the following: Replies to interrogatory messages which contain the words "*Reply paid.*" Messages for transmission within the colony of Queensland, or to any of the Australian Colonies and New Zealand, marked "*Collect,*" when the sender is known to the officer in charge of the despatching station, and guarantees, in writing, that in the event of the message not being paid for on delivery, it will be paid for on demand by the sender; in all such messages, the word "*Collect*" must be written by the sender as the last word of the message to be despatched; press messages to be paid for at receiving station on delivery.

When the sender wishes to pay for a reply, have the message repeated or posted, instructions are to be inserted in the address immediately before the name of the terminal station. Messages which are addressed beyond the limits of delivery, can be posted to their destination free of charge.

Messages may be transmitted in *cypher* in the English language or *secret language*, but cypher words must not contain more than three syllables, and words in secret language must not average more than five letters; an additional charge of fifty per cent. to be made for messages containing cypher or secret language.

Messages will be delivered free within one mile of the station to which addressed. If beyond that distance according to the instructions contained in the address. Expenses incurred for porterage, cab hire, or boat hire, payable by the receiver, will be charged. Messages addressed beyond the limits of delivery, or which do not contain special directions as to transport, may be posted to their address by the terminal telegraph station-master free of charge. The sender or receiver of message, on proving his or her identity may receive certified copies of messages on giving the date and paying a fee of one shilling for each copy. In the event of an interruption to communication by which messages may be unusually delayed, it will be optional with the senders, on application before transmission, to withdraw their messages and receive back the amount paid. If desired, messages of consequence can be repeated from stations at which received to stations at which originally sent, on payment of an additional half-rate; but no responsibility will be undertaken nor any claim for compensation entertained for any errors or mistake in transmission or delay in delivery of messages.

INTERNATIONAL TELEGRAPH.

By the system of registration of name and address, and the adoption of the word by word scale of charging, the cost of telegraphing between Brisbane and London and many of the leading cities of India, China, Japan, Europe, United States and other countries has been greatly reduced. It may be necessary to explain that the name and address of the sender and receiver being registered at the points of departure and arrival, a single word, letter, or number serves for their identification.

The principal conditions under which messages are transmitted are as follows:—

Words must not exceed ten letters. Only ordinary dictionary words allowed. Groups of figures will be charged at the rate of five to the word. Cypher telegrams may be used, but if so, must be collated, that is, repeated back in their entirety from station to station, for which half rate additional will be charged.

Registration can be effected at the Central Telegraph Office, Brisbane. No fee is charged. Messages can be sent through Reuter's Telegram Co. and the Oriental Co., both of which have agents in Brisbane.

SCALE OF CHARGES.

For telegrams, inclusive of names and addresses, from any station in Queensland to places situated in the following countries:—

	Price per word. £	s.	d.
Aden	0	10	5
Algeria and Tunis	0	10	10
China—Hong Kong	0	8	4
„ Amoy	0	10	0
„ Shanghai	0	10	0
„ Cochin China	0	7	1
Egypt	0	11	8
Europe	0	10	10
„ *via* Amoor	0	16	8
India *via* Madras, West of Chittagong and Ceylon	0	8	1
„ *via* Madras, East of Chittagong	0	8	4
„ *via* Rangoon, West of Chittagong	0	8	4

	Price per word. £	s.	d.
India, *via* Rangoon, East of Chittagong	0	8	1
„ *via* Amoor	0	18	9
Japan (Nagasaki)	0	11	8
Java	0	4	5
Penang	0	5	10
Persia (*via* Persian Gulf)	0	10	3
Russia in Asia	0	11	8
Singapore	0	5	10
Turkey in Asia (Seaports)	0	9	7
„ „ (Inland)	0	9	10
„ „ (Archipelago)	0	10	1
United States	13s. 10d. to	0	14 10

When the registration has not been effected the charge for a message of twenty words from any Telegraph Station in Queensland to London is £9 16s. 6d.

This TABLE, showing the difference of LOCAL TIME between BRISBANE and the undermentioned places will be found of service to those using the telegraph.

The Fares between Intermediate Stations on both Railway lines are about 3d. per mile first-class, and 2d. per mile second.

Return Tickets, Southern and Western and Northern Railways, are only available upon the day of issue. On Fridays and Saturdays, Excursion Tickets will be issued on application at single fares for the double journey, available until the following Monday.

Children under 3 years of age, "Free"; over 3 and under 12, Half-Fares.

Carriers' Tickets (Northern Railway).—Tickets at single fares for the double journey will be issued to carriers accompanying their loading, from Blackwater to Rockhampton, available for fourteen days.

Season Tickets will be issued on application to the Railway Office, Brisbane, or the Traffic Manager, Rockhampton, for one, three, six, or twelve months, between all stations on the Southern, Western, and Northern Lines at greatly reduced rates, which can be learned on application at the before-mentioned offices.

PARCELS, GOODS, AND LIVE STOCK RATES.

PARCEL RATES.

Southern and Western Railway.

N.B.—No claim for loss or damage, for which the department is accountable, will be allowed, unless made within twenty-four hours of the arrival of the parcel or parcels; and the delivery of such parcel or parcels will be considered complete when notice of arrival is given to the consignee.

Miles.	3 lbs. and under.	7 lbs. and under.	14 lbs. and under.	28 lbs. and under.	56 lbs. and under.

176 to 200.. ..	2 6	3 0	3 3	3 6	4 6

All packages over 56 lbs. will be charged at Goods Rates.

All parcels to be at stations thirty minutes before the advertised time of departure of the train by which the senders wish them forwarded.

Opium double rates.

Parcels over £10 value and under £50, double rate, and over £50, quadruple rate.

Although these rates are charged, and the value of such parcels declared accordingly, the Commissioner for Railways will not hold himself responsible for contents.

Newspaper parcels and despatches, half rates; minimum charge, 6d.

Packed parcels, quadruple rates.

All parcels arriving at stations addressed "To be left till called for," if not taken delivery of within twenty-four hours after arrival, will be subject to the same charges as for cloak room packages.

GOODS RATES.

Goods are charged according to the following classification:—

First Class, Second Class, Third Class, Agricultural Class (Nos. 1 and 2), and Exceptional.

In the FIRST CLASS are included Ale and Beer in bulk, Castings, Metal, and Oilmen's Stores. The SECOND CLASS absorbs all goods not otherwise provided for. The THIRD CLASS comprises manufactured articles of all descriptions usually kept and sold by tradesmen. SPECIAL CLASS includes Building Material, Station Produce, Ores and Minerals. Exceptional Goods are Ballast, Manure, Building Stone, and other rough and heavy material.

SIGNALS IN USE AT BRISBANE OBSERVATORY.

The numbers of the Flags may be easily recognised from their comprising as many divisions or stars as they are intended to represent. Any number higher than nine is indicated by one Flag over another—8 over 5 indicating 35. When two of the same figure require to be shown, as 11 or 22, the white Flag is used to indicate the second number—Eleven would be shown by the Flag for 1 and the substitute beneath it.

DESCRIPTIVE FLAGS.

Steamer—Blue and Yellow Chequer.
Ship or Barque—Blue Flag.
Brig—White Flag with Red Square in Centre.
Schooner—Red Flag with Yellow Square in Centre.
Cutter—Yellow Flag with Blue Square in Centre.

MAIL SIGNALS.

English Mail VIA SUEZ, arriving in any adjoining Colony—Red Ensign on Observatory Flag staff. VIA SAN FRANCISCO—Blue Ensign on Observatory flagstaff. VIA TORRES STRAITS, White Ensign on Observatory flagstaff and kept flying for two hours.
A.S.N. Company's Steamers—Their Flag, which is divided diagonally into four parts, each side quarter blue, and top and bottom red.

EXPLANATION OF SIGNALS.

Vessels in sight to North or South of Cape Moreton—Descriptive Flag at the North or South yard-arm, according to the direction whence the vessel is coming.
Entering South Passage—Second Distinguishing Pendant below Descriptive Flag.
Entering the Port—Signal from mast-head.
Numeral Flags under descriptive Flag are hoisted when Port of departure can be ascertained.
Steamers coming up River—White Flag under Descriptive Flag
Two or more vessels of same description from same port—Numeral Pendant above Descriptive Flag
Vessels returning to Port—First Distinguishing Pendant below Descriptive Flag.
Vessels at the Bar entering Port over night—Third Distinguishing Pendant below signal
Steamers going to anchor below Flats, waiting Tide—Third Distinguishing Pendant below Descriptive Flag
Vessel with Governor—Union Jack above Descriptive Flag.
Vessel with Immigrants—Red Ensign above usual Signal.
Steamer with English Mail—Red Ensign below usual Signal.
Vessel passed the Port—Ball at Yard-arm, with Descriptive Flag under.
Ship of War—Union Jack below Descriptive Flag.
Vessels with Troops—Numeral Pendant below Descriptive Flag.

SIGNALS IN USE AT THE PORTS OF QUEENSLAND.

Pilot—Union Jack at the fore
Pilot Boat—White and Red Flag horizontal
Customs—Union Jack at the Peak
Water Police—(Day Signal)—Ensign at the main
Water Police—(Night Signal)—Gun to be fired and a bright light to be hoisted at the peak and mizen
Steamboat—Rendezvous Flag at the peak or mizen
Gunpowder on board—Union Jack at the main
Health Officer—Blue Flag at the main
Medical Assistant—No. 5 at the peak
Mails on Board—White Flag at the fore, to be kept flying until the mails are delivered
English mails—Ensign at the fore
Exemption—(Day Signal)—White Flag at the main
Exemption—(Night Signal)—Two bright lights hoisted vertically, in some conspicuous part of the vessel, the distance between the lanterns not being less than six feet
Government Immigrants on board—Ensign at the mizen
Quarantine—Yellow Flag at the main

SHIPPING SIGNALS, MADE FROM SIGNAL STATION, GRASSY HILL, ENDEAVOUR RIVER.

A sail in sight to northward—Corresponding flag.
A sail from southward in sight—Corresponding Flag under ball.
When description of vessel can be made out—The descriptive Flag will be hoisted instead of previous Flag.
When Port of departure can be ascertained—The Numeral Pendants will be hoisted under Descriptive Flag.
The number of vessel signalled—Will be shown by the corres ponding Numeral Pendant over Descriptive Flag.
On vessels anchoring outside Port—The Numeral Pend ant, if hoisted, will be hauled down, and a White Pendant will be hoisted over the Disting uishing Flag, the signal being kept flying for a quarter of an hour.
On vessels anchoring inside bar—Same as above except that White Pendant will be hoisted under the distinguishing flag.
Vessels passing the port will be denoted by—The Des criptive Flag being lowered half-mast high and kept flying for a quarter of an hour.
On the arrival of a vessel with the Governor on board—The Jack over Descriptive Flag.
On the arrival of a ship of War—The Jack under Descriptive Flag.
On the arrival of a vessel with Emigrants—The Ensign over Descriptive Flag.
On the arrival of a vessel with English Mail—The Ensign under Descriptive Flag.

THE FIELD, FARM, AND GARDEN.

FARM AND GARDEN CALENDAR.

THE following directions are more especially for the Southern and Coast Districts ; in the more Northern portions of the Colony sowing should take place earlier than the times here given.

JANUARY.

GARDEN.—Being the hottest month of the year, very little can be done in the way of sowing with the hope of successful result, except shade and abundant water can be given. Small quantities of the following seeds may be sown : Cabbage, cauliflower, Brussels sprouts, turnips, spinach, celery, French beans, and green peas, also of cucumbers and melons, for late crops. Attend to the grapes as they ripen. The foliage of those wanted to hang till dead ripe should be arranged so as to shield the grapes from the rays of the sun. The Isabella may still be cut for late crop. Strong shoots of favorite grapes may be bent

FARM AND GARDEN CALENDAR—*Continued.*

down and layered; in this way better rooted plants may be obtained than cuttings can produce, and a season saved. Peach trees should now be allowed, and encouraged, to make a sufficiency of wood for next season's crop. Attend to the pinching and shortening of young shoots on apple and pear trees. Stone-fruited trees may now be budded. Intending cultivators of celery, cauliflowers, cabbages, &c., should get together as much dung as possible, the quality of which will be much improved by frequent turning, and shelter from heat, and particularly rain, the latter washing out the salts, on which its properties mainly depend. The more hardy annuals may be sown in the flower garden. Dahlias, Chrysanthemums, and other tall flowering plants should be tied up and staked.

FIELD.—Sow maize for late crop. Sow patches of oats or barley for cutting green. Break up and prepare land for potatoes, lucerne, &c. In breaking up land, it is better to leave the surface rough and open to the action of the sun's rays, which are the best pulverent. A rough surface also retards the growth of weeds. Arrowroot is now making its growth, and ought to be kept clean to allow the free circulation of air.

FEBRUARY.

GARDEN.—Take advantage of moist and dull weather for sowing early crop—small quantities of vegetable and salad seeds. To guard against failure from scorching, cabbage, cauliflower, and celery seed beds should be protected by a shading of calico or sacking; a few boughs laid on saplings supported on forked sticks make a good rough artificial shading. See to have some well-rotted dung prepared for celery trenches. Budding should be finished this month. In the flower garden, remove decayed foliage to the manure heap, and save valuable seeds as they ripen.

FIELD.—In sheltered situations along the seaboard, maize may be planted during the first two weeks of the month. Hill maize of former plantings; early hilling tends to keep down suckers. Continue the preparation of land for wheat, lucerne, and potatoes, and commence planting the latter, changing the seed if disease of any kind has shown itself. Usually fresh seeds of all kinds are best procured from localities having a different climate to that where they are intended to be grown.

MARCH.

GARDEN.—The scorching heat of our Queensland summer is now over, and this is the best time to enter thoroughly into the cultivation of European vegetables. Sow for full crops of cabbages, Savoys, cauliflowers, Brussels sprouts, couve tronchuda, turnips, carrots, onions, leeks, beans, peas, beets, parsnips, parsley, salad, &c. If any plants were raised from previous sowings, transplant on favourable occasions. It is a good plan to prick young cauliflowers into a bed of nice rich earth, placing them, about four inches apart; they occupy little room, and can be easily watered and shaded for a few days. It breaks their roots, they emit small fibres, become more sturdy and compact, and do not droop so much when finally put out. Couve tronchuda, or Braganza cabbage is a vegetable of considerable value; the main rib of the outside leaves resembles the sea-kale when well boiled, but the heart is the best; it ought to get as much room as cauliflower. Cauliflowers yield a fair return when properly cultivated, but brocoli ought to be avoided by the cottager, as it is not suited to the climate, and does not expand its flower. Broad beans also frequently fail to pod, or do not pod till the spring; every bee-keeper however ought to sow a quart or two, as they afford a rich pasturage to the bee at a time of the year when flowers are scarce. In the flower garden fill up vacancies caused by the removal of dahlias, &c., by sowing a selection of hardy annuals. Here again the bee-keeper will find it to his advantage to sow plenty of mignonette, as no other plant furnishes such an abundant and continuous supply, both of honey and pollen.

FIELD.—This is the best month for planting potatoes, and the planting should be if possible, finished before the close of the month. Those planted last month should be hoed in due time, and the weeds well turned up to the sun. Sow mangold wurtzel; this plant is worthy of a trial by those interested in the home feeding of cattle; the aphides do not attack it, and, if left in the ground, it will keep over our hottest and driest summer.

APRIL.

GARDEN.—Attend to those vegetables which were sown last month; beans and peas should be kept clean; cabbages and cauliflowers, when fit to handle, should be transplanted; turnips and carrots should be thinned. Sow some of the more suitable vegetables and salads for succession; but the cottage gardener will find little satisfaction from cauliflowers, Savoys, or Brussels Sprouts, if sown late this month—his principal dependence for greens should be on the cabbage. Earth up celery if the weather is dry, not otherwise. Bananas during this and the next month are apt to break down; heavy branches should be propped. In the flower garden, all alterations or additions should be made, as evergreen shrubs, roses, &c., bear moving well now. This is also a good time to transplant bulbs. Make a sowing of hardy annuals for spring decorations.

FIELD.—Prepare land for oaten hay crops, and sow a patch for cutting green. Land intended for lucerne should be cleaned, drained, and deeply cultivated. The rapidity with which summer grass and other weeds cover the surface of the soil during the early months of the year, and the soddening effects of heavy rain, will be an objection to the preparation of land long before seed time; but in the case of lucerne, no pains should be spared in getting a pulverised and mellow bed for the seed. Lucerne may be sown. Mangold wurtzel may still be sown.

MAY.

GARDEN.—Sow cabbages, turnips, carrots, peas, onions, parsley, and culinary herbs—such as sage, marjoram, and thyme, and continue the planting out of cabbage and other plants, choosing a dull day or just before rainfall. Rhubarb may now be planted, taking care that the ground is well manured and deeply trenched. New strawberry beds may be laid out, and should be made where a plentiful supply of water may be ensured. Orange, limes, and all evergreen fruit trees and ornamental shrubs may be planted during this and the two following months, but, when convenient, give this month the preference. A situation sheltered from westerly winds should be selected for azaleas and camelias—which flower during June, July, August, and September—as shelter very much prolongs the life of the flowers.

FIELD.—Sow lucerne:—If this seed were sown in drills, so as to permit of being hoed as farmers do their wheat in England, it would give the young plants a good start, and would much promote the subsequent vigor and performance of the crop; if drilled, five pounds less seed may be given to the acre. As spring maize, from the general dryness of the season, frequently yields but a poor return, it is better to sow but a small breadth of this crop and in its stead to have oaten hay, the stubble of which, when ploughed in in November and December, will give a full crop of maize. Commence oat sowing for hay crop, sowing the poorest soils first. Sow also wheat for grain crop. Attend duly to the hilling of potatoes.

FARM AND GARDEN CALENDAR—*Continued.*

JUNE.

GARDEN.—Peaches, mulberries, quinces, apples, pears, &c., may now be transplanted, but young and vigorous growing late peaches and apples, which are yet green, may be left for a week or two. The apple is coming into favor in the Southern part of Queensland ; a few trees ought to be planted in every garden. The following are twelve sorts which bear well in the neighbourhood of Brisbane :—Nonsuch, Mobbs' Royal, Mammoth, Kirke's Golden Pippin, Five Crown Pippin, Greening, Smeating, Kerry Pippin, Golden Harvey Reinette, Blanche d'Espagne, Blenheim Pippin, Sykehouse Russet. Grape vines may be pruned, unless cuttings are wanted, in which case they had better be left till the middle of next month. If your vines are young, apply the knife fearlessly, cutting down to one or two eyes. Peaches, mulberries, figs, &c., should now be pruned, remembering that thorough pruning gives superior fruit. Heavy bunches of bananas should have a thin sack drawn over them, to protect them from the frost and the blighting influence of our westerly winds. The bottom of the sack should be open, that the ripening of the fruit may be observed. Sow peas, turnips, onions, cabbages, leeks, parsnips, and beet. In the flower garden, propagate petunias, verbenas, geraniums by cuttings, and herbaceous plants by division.

FIELD.—Continue to sow oats for hay, and the lucerne sowing ought to be finished this month. Make preparations for the manufacture of arrowroot. Wheat and barley may still be sown for late crops.

JULY.

GARDEN.—Go on with the pruning of deciduous trees (trees whose leaves fall). Vine pruning ought to be finished, and if an increase of plants is wanted, cuttings ought to be taken from straight, well-ripened wood of last year's growth ; they should be about fifteen inches long ; three-fourths of their length should go in the ground, and the earth should be well trod round their base. Orange grafting should be commenced. In the flower garden, dig the flower beds. give a dressing of well rotted manure when it is required. Frame roses, and sow such annuals as sweet peas, larkspurs, lupins, zinnias, Phlox Drummondii, calliopsis tinctorus, German stocks. Re-pot fuchsias. The following selection of roses will give satisfaction to every one who will take the tronble to cultivate them :—Souvenir de Malmaison, Souvenir d'un ami, Safrano, Gloire de Dijon, Indica alba, Cramoise superieure, Fairy, Princess Adelaide, Prince Albert, Bourbon Queen, Marechal Niel, Géant des Battailes, Prince Camille de Rohan, Lord Macaulay. In the Kitchen Garden, broad beans and peas may be sown, and lettuce, cauliflowers, and onions transplanted.

FIELD.—The farmer ought to look forward to the planting of potatoes, sweet potatoes, cotton, arrowroot, and oats for hay, and lay his plans and prepare his ground accordingly ; the plough should therefore be kept going, and the harrow and roller should follow the plough closely, to prevent evaporation. A few potatoes should be planted, and the manufacture of arrowroot proceeded with.

AUGUST.

GARDEN.—Orange grafting should be finished the first week of this month, and pears, apples, peaches, grapes, &c., as soon after as possible. The transplanting of trees should be finished, during this and the following month, some trees and plants may require watering, and every newly planted tree, if the weather be dry, should be well settled in its place with water and some litter placed over the roots to prevent the ground from baking. In all cases where watering has to be done, as much should be given as will keep the ground moist for a considerable time, as frequent sprinklings are much more injurious than useful. In the first place they act as a stimulant, and interfere with the routine of nature. The earth is the storehouse whence the plants draw their supplies, and which must come to them in the shape of moisture or vapour. The heat of the sun will call up as much moisture from the lower strata of the soil as will keep plants alive, and in some degree of health, long after the upper surface is parched and unfit for vegetation. The roots of plants spread themselves downward and outward to catch the moisture as it passes, at the bidding of the sun to the atmosphere, and the foliage of plants accommodates itself to its circumstances, by becoming hard and evaporating less ; or, in other words, it is forced to practice economy during bad times. In the second place there are few soils porous enough in their texture to bear frequent surface waterings in bright weather, as, when water is given, it brings them to a condition more or less resembling mortar, while the next day's sunshine transmutes them to a state which may be described as "bricky." This rapid battering of the soil is accompanied by a strong evaporation, which is chilling and injurious to the foliage of the plants through which it passes ; hence the rusty and unhealthy appearance of most plants which undergo a bi-weekly sprinkling. The aim, then, should be to get the water into the soil rather than on to it. To accomplish this, make a hole near the plant to be watered, and pour in as much water as will moisten the earth by diffusion for some distance round, but do not raise the water to within three inches of the surface. When enough has been given, and the water well soaked away, fill the hole. There will be some evaporation and consequent chilling, but the washing and battering effects on the surface will be avoided. There are some hard-wooded evergreens, such as the camelia, which is rather difficult to establish in the ground during the fierce heat and drought of our spring month. A day or two before such stock are put out, the place where they are to grow should be thoroughly wetted, and when the ground has recovered sufficiently to work without sticking to the spade, the plants should be put in and well settled in their place with water ; a few leafy boughs should also be stuck in to shade them from the mid-day sun. If treated in this way, they will gradually accommodate themselves to their new circumstances, and start into vigorous growth during their second season ; whereas, bi-weekly sprinklings in bright weather is certain death to the camelia. Where it is absolutely necessary to practice surface watering, let it be done after sundown, and the ground forked up next day. Make a small sowing, in a sheltered place, of cucumbers, melons, and French beans.

FIELD.—Potato planting should be finished early this month. It is also well to begin the planting of maize, as the sooner it is planted the deeper it will root before the warm weather begins. Finish the making of arrowroot. Arrowroot may be planted, also rice and sorghum.

SEPTEMBER.

GARDEN.—Pears and apples may still be grafted. The grape vines will now be pushing, and stakes and trellissing, if not already attended to should be got into proper repair at once. Galvanised wire, supported on hardwood posts, makes a durable and cheap trellis. Attend to the vines as they break, and rub off superfluous shoots from the root and breast of the vine, and tie in young fruiting shoots in good time. White maize (not Tuscorora), if sown occasionally during this and the following months till January, will yield a vegetable, if used green, equal to green peas. Sow hibiscus rosella, passion fruit, and Cape gooseberry, make full sowing of French beans, cucumbers, rock and water melons, marrows, pumpkins, tomatoes, and capsicums. Transplant cabbages on favourable occasions. This is one of the driest periods of the year, and it is consequently a good time for the destruction of weeds. If the walks and

FARM AND GARDEN CALENDAR—*Continued.*

flower borders get a thorough cleansing just now, they will not give much trouble for some time. A neat verge or border for the walks greatly enhances the appearance of a garden; Euphorbia Bojeara may be suggested as suitable for this purpose; it is easily propagated by division and cutting, is compact in its habit, and may easily be kept in trim; it stands the drought well, and is in flower during the greater part of the year. Dahlias will now be pushing, and should be put up. Fuchsias, also, will be growing fast, and ought to be carefully tended. If no cuttings were struck last month, it may still be done, selecting short-pointed stiff young wood.

FIELD.—Finish maize planting for spring crop. Grow sorghum for green fodder. Plant arrowroot and sweet potatoes, sow cotton, tobacco, &c. Hill potatoes. Prune cotton; it is better to prune low—about six inches from the surface of the ground.

OCTOBER.

GARDEN.—Peach trees ought to be well attended to at this season; all young shoots, but more espe cially the gross ones, should be pruned away. Those who will take this trouble will secure large fruit. The minor enemies of the cultivator will now be manifesting their power. The ground ought to be cleared of the roots of cauliflowers and savoys destroyed by the aphis, but some roots of the cabbage may be left in the ground as they yield a supply of wholesome greens during the summer. The grub may be committing ravages among the potatoes and maize, and the lady-bird among the marrows, cucumbers, and pumpkins; there is no cure for these pests but hand-killing, and it should be done. If the scale is spreading on the orange tree, dress with Gishurst's Compound, or reduce a strong clay to the consistence of cream, and apply it to the affected part; when it dries it will shell off and bring a great deal of the smut and scale with it. The vines now require constant care; pinch laterals at their third or fourth leaf, and shoots disposed to ramble should be stopped. In tying in, dispose of foliage so as to shade the fruit. It will be necessary after the middle of this month to keep a sharp look out for that dread scourge of the grape vine, *Oidium Tuckerii*. If the slightest trace of the disease is discovered, sulphur should at once be applied, either by itself or mixed with any proportion of finely sifted lime up to one half. Sow cucumbers for succession, the vegetables mentioned last month may still be sown. Plant pineapples, bananas, olives, mangoes and other tropical fruit trees. In the flower garden, sow such annuals as balsams, cockscombs, nasturtiums, and amaranths.

FIELD.—If potatoes are not earthed up, do it at once, and do it carefully, on account of the great heat to which they will be subjected before they are ripe. Plant sweet potatoes, sow cotton, transplant tobacco. Cotton pruning should be finished the first week of this month.

NOVEMBER.

GARDEN.—Intending planters of pineapples and bananas should now be busy in order that the plants may derive the full benefit of the coming summer. It is time lost to put in these plants in autumn or winter, as they do not start into growth till roused by the heat of the following season. The Isabella, and some other grape vines, will yield a second crop if some of the strong shoots are now cut. In every bud along the cane the embryo flower for the next season is embedded, and if the shoot is cut while the sap is flowing strong in the vine, one or two of the buds next below the cut will burst, and, in the case of the Isabella, flower and bear fruit. In most of the other varieties, the flower, not being forward enough, either drops prematurely, or is absorbed into the young shoot. Begin with a few shoots of the Isabella. Attend to the training of the grape vine generally, remove suckers and all barren shoots that will not be wanted for next year, pinch laterals and shoots rambling beyond due bounds. The sulphurings of the last month may have only checked the vine disease; if the weather is moist and warm, great watchfulness will be necessary in order to avert the consequences of a fresh outbreak. In the kitchen garden cabbages may be planted out before rainfall, and French beans, marrows, and rock melons sown for succession.

FIELD.—Hay-making should be finished, and the stubble ploughed for winter maize; it is better, however, not to put in the maize seed this month, as the crop will be more heavy and regular if planted in December or January. There are often a great many blind or barren stalks in maize planted in November.

DECEMBER.

GARDEN.—It is a difficult matter to keep up a supply of vegetables during the summer months, unless a plentiful supply of water can be got, French beans and marrows are the most certain, and foresight should be used in adapting the sowing to the probable demand. Marrows, however. may be stored, or consumed by poultry and pigs, so it is better to have plenty. Good crops of pumpkins may be gathered from seed sown early this month. Should a day or two of moist dull weather occur, some cauliflower, cabbage, and celery seeds may be sown. Prolong your grape season by extracting a second crop out of the Isabella. If the *Oidium Tuckerii* is not yet subdued, the vines may be syringed with the following mixture, as dry sulphur is unsightly on fruit which may in a few days have to go to market or appear on table: one pound of sublimed sulphur, one pound of fresh-slacked lime, and one gallon of soft water; these are to be boiled for twenty minutes, and then strained, to this liquor add one gallon more water, and boil for twenty minutes longer. It is then to be allowed to cool, and stored away in a jar. When used, mix one pint with ten gallons of water. Apply with a syringe. In the field maize may be planted for wintercrop.

NOTES FOR THE FARMER AND GARDENER.

Let the draining and trenching of the ground be your first care. It is impossible to succeed to any extent with crops, vegetables or flowers where the water is stagnant in the soil.

Let the soil be well prepared for the flower garden, and pulverised as much as possible.

Gather fruit in dry weather and with the sun shining, and place it as carefully in the basket as if it were glass. The smallest bruise commences a decay.

Unless you want seeds, remove the flower stems so soon as the bloom decays. The swelling of the seed pods checks the further growth and blossom of most plants.

Never grow the same crops, nor crops of the same family, twice successively on the same spot. Plants of the same natural order should never succeed each other. Crops which must remain in the same ground for a number of years, such as seakale, rhubarb, strawberries, asparagus, &c., should be followed by crops of short occupation, such as French beans, for young use, salads, early cabbages, &c. Root or bulb crops, such as carrots, parsnips, potatoes, turnips, beet, &c., should not succeed each other, even when of different natural orders.

Never transplant shrubs and trees in a growing state. However carefully it may be done, the check is dangerous, if not fatal.

Never tie up lettuces or endive, or earth up celery except when perfectly dry.

Never water the grouud while the sun shines; after sunset is the proper time.

Never allow the surface of the soil, in a pot or in the ground, to be long without stirring, unless it be naturally very open. It should be hoed over, at least once a fortnight.

Whenever a shrub or plant suffers the loss of root, prune off a corresponding part of the head.

Always cut off cleanly whatever part of a root may be broken, bruised or damaged; as it quickly begins to decay.

Prune all ornamental blooming trees and shrubs as soon as the flower has decayed; before they make their new growth they can be shaped to any form.

In removing trees and shrubs never loosen the roots and fibres by violence or you may seriously affect the growth.

MANURE.

Plants are composed of the following constituents:—Potash, soda, lime, magnesia, silica, phosphorous, sulphur, iron, and one or two other ingredients. These constituents or food are derived principally from the ground. It therefore follows that for the plant to thrive and grow healthy, it must be able to obtain a sufficient supply from nature's treasury; in fact this chemical food for the plant must be as systematically supplied as food for an animal. The growth of a plant absorbs more or less of the earthy ingredients spoken of.

The fallen leaves of trees when rotted into mould form an invaluable manure.

SEED PLANTING.

The approximate time required for seeds to germinate at a temperature of about 60 deg. is as follows:—Garden cress 2 days; spinach 3 days; cabbage, turnips and lettuce 4 days; endive, melons, cucumbers and mustard 5 days, radish, horseradish,, onions and leeks 6 days; barley, maize, cauliflower beans, and beet, 7 days; wheat, thyme, marjoram, French beans, 8 days; peas, 9 days; vetches and tobacco, 10 days; tomatoes, carrots, stocks, celery, and clover, 15 days; sago and pepper, 20 days; potatoes, parsnips, and parsley, 21 days.

Much depends on the weather, the time of sowing, and the depth at which sown as to the period when the shoots should make their appearance.

The germination of flower and vegetable seeds can be much hastened by placing them for a few hours in warm water.

Seeds should not be covered too deeply; in many cases just a sprinkling of soil will be sufficient.

Quantity of seed necessary to sow an acre:—

Wheat and barley, 2 to 3 bushels; oats, 2 to 4 bushels; rye 2½ bushels; ryegrass, 1 bushel; clover, 10 to 12 lbs.; trifolium incarnatum, 24 lbs.; lucerne, 20 lbs.; carrots, 8 to 12 lbs.; mangold-wurtzel, 5 to 8 lbs.· turnips, 2 to 3 lbs.

Quantities of seeds wanted to sow rows of stated lengths or plots of garden ground:—

Asparagus bed 15 square yards, ½ pt.: beans, broad, per row of 80 feet, 1 qt.; beet, row of 50 feet, 1 oz.; broccoli, per 4 square yards, ½ oz.; brussels sprouts, per 4 square yards, ½ oz.: cabbage, bed of 8 square yards, ½ oz.; carrots, drill of 120 feet, 1 oz.; carrots, bed of 12 square yards, 1 oz.; cauliflower, 4 square yards, ½ oz.; celery, 4 square yards, ½ oz.; cress, 3 square yards, 1 oz.: endive, 4 square yards, ½ oz.; kale, 4 square yards, ½ oz.; kidney beans, row of 80 feet, ½ pt.; leek 2 square yards ½ oz.; lettuce, 4 square yards, ½ oz.; onions, 9 square yards, 1 oz.; parsley, row of 80 feet, 1 oz.; parsnip, drill of 200 feet, 1 oz.; peas, row of 60 feet, 1 pt.; radishes, 4 square yards, 1 oz.; savoy, 4 square yards, ½ oz.; spinach, 10 square yards, 1 oz.; spinach, drill of 120 feet, 1 oz.; turnip, 4 square yards, ½ oz.

Number required of trees or plants for an acre according to the distance are, 1 foot apart, 43,560; 1½ feet apart, 19,360; 2 feet apart, 10,890; 2½ feet apart, 6,960; 3 feet apart, 4,840; 3½ feet apart 3,556; 4 feet apart, 2,722; 4½ feet apart, 2,151; 5 feet apart, 1,742; 5½ feet apart, 1,440; 6 feet apart, 1,200; 6½ feet apart, 1030; 7 feet apart, 880; 7½ feet apart, 775; 8 feet apart, 680; 8½ feet apart, 602; 9 feet apart, 538; 9½ feet apart, 482; 10 feet apart, 436; 10½ feet apart, 361; 12 feet apart, 302; 13 feet apart, 258.

LAND MEASUREMENT.

An acre of land contains 4 roods or 10 square chains or 160 rods or 4840 yards or 100,000 links. A chain consists of 100 links or 22 yards or 66 feet. The following various measurements show what constitutes an acre, and will enable anyone to form an approximate estimate of the area of land.

5 yards wide by 968 yards long—10 yards wide by 484 yards long—20 yards wide by 242 yards long—40 yards wide by 121 yards long—70 yards wide by 68 1-9th yards long—80 yards wide by 60½ yards long—60 feet wide by 726 feet long—120 feet wide by 363 feet long—220 feet wide by 198 feet long—240 feet wide by 181½ feet long—440 feet wide by 99 feet long.

LAND OR SUPERFICIAL MEASURE.

144	square inches	1 square foot
9	square feet	1 square yard
272¼	feet or 30¼ yards	1 rod, pole, or perch
40	rods, poles or perches	1 rood
16	poles	1 chain
4	roods or 10 chains	1 acre
640	acres	1 square mile (a section of land).

Land is measured by Gunter's chain, which is as follows:—

LENGTH.—7.92 inches one link, 12 inches or 1.515 links one foot, 36 inches or 4.545 links one yard, 198 inches or 25 links one pole, 702 inches or 100 links or 66 feet or 22 yards one chain, 7920 inches or 1000 links or 10 chains one furlong, 63,360 inches or 8000 links or 80 chains one mile.

SQUARE.—62.726 inches make one square link, 2.295 square links one square foot, 22.661 square links one square yard; 625 square links one square pole, 10.000 square links one square chain, 25.000 square links or 2.5 square chains one square rood, 100.000 square links or 10 square chains make one square mile.

RULE FOR ASCERTAINING THE WEIGHT OF CATTLE.—Measure the girth close behind the shoulder, and the length from the fore-part of the shoulder-blade along the back to the bone at the tail, which is in a vertical line to the buttock, both in feet. Multiply the square of the girth expressed in feet, by five times the length, and divide the product by 21; the quotient is the weight nearly of the four quarters, in imperial stones, of 14lb. avoirdupois. For example, if the girth be 6½ feet and the length 5¼ feet, we shall have 6½ multiplied by 6½, making 42¼, and 5¼ multiplied by 5, making 26¼; then 42¼ multiplied by 26¼, making 1109 1.16, and this, divided by 21, gives 52 4-5 stones nearly, or 52 stones 11 lb. It is to be observed, however, that in very fat cattle the four quarters will be about one-twentieth more, while in those in a very lean state they will be about one-twentieth less, than the weight attained by this rule. The four quarters are little more than half the weight of the living animal; the skin weighing about the eighteenth part, and the tallow about the twelfth part of the whole.

WEIGHTS in England of the fleece of different breeds of sheep of long-woolled breeds:—"Lincolnshire" sheep, lowland 10lb., upland 8lb.; "Leicester," 7lb.; "Cotswolds," 7 to 8lb.; "Romney Marsh," 8lb.; "Blackfaced Scotch," 3lb.; "Exmoor," 4 to 5lb.; "Devonshire South Hams," 9lb.; "Bampton," 7lb.; "Hardwicks," 3 to 4lb. Intermediate Breeds—"Dorset," 6lb.; "Cheviot," 5 lb.; "Radnor and Welsh," 1 to 1½lb.

FOOT-ROT.—The following is recommended:—Remove sufficient horn to allow any confined matter to escape, and apply a styptic or caustic to the part, so as to prevent proud flesh growing, and to stimulate the vascular parts to secrete healthy horn. Muriate of antimony, applied with a feather, is a very convenient caustic, and so are likewise equal parts of hydrochloric acid and tincture of myrrh; a strong solution of sulphate of copper is a milder dressing; and tincture of aloes or friar's balsam is milder still. All these are useful if applied with discretion, according to the severity of the case. Another useful application, as well as a preventive, is coal-tar, particularly if a little creosote is left in or added to it; and some powdered plaster of Paris over the tar will assist its drying effect. A change to a dry pasture or soil is necessary. A good recipe is—Sulph. of lime, powdered, 1 oz.; sulph. of zinc, do., 1 oz.; creosote, 1 scruple; Stockholm tar, 4 oz.; lard, 4 oz.; to be made into an ointment, and applied occasionally to the feet of the sheep, and between the claws, first paring the overlapping horn away, and clearing everything away without drawing blood.

TABLES FOR BUILDERS
AND OTHERS ENGAGED IN CONSTRUCTIVE WORK.

BRICKLAYERS.

Brickwork is generally measured by the rod of 16½ feet, or 272¼ square feet. It is estimated at one and a half brick thick, which is called the standard thickness.

To reduce cubic feet to the standard multiply by 8 and divide by 9.

If a wall be more or less than the standard, multiply the superficial contents of the wall by the number of half bricks in the thickness, and divide the product by 3.

A cubic yard of clay will make 460 bricks.

A brick when burnt is 9 inches long, 4½ inches wide, 2½ in. thick, and weighs about 4½lbs.

32 bricks will cover one square yard.

1 rod of brickwork is equal to 306 cubic feet, or 11⅓ cubic yards, and weighs 15 tons.

1 rod of brickwork laid dry, as in walls, requires 4800 stock bricks; if in walls, 4700 stock bricks.

1 rod of brickwork laid in mortar requires 4300 stock bricks.

1 foot superficial of reduced brickwork requires 16 bricks.

1 foot superficial facing, Flemish bond, requires 7 bricks.

450 stock bricks make one ton.

500 bricks make one load.

1000 bricks stacked close are equal to 50 cubic ft.

1000 old bricks cleaned and stacked loose equal to 72 cubic feet.

CEMENT—One barrel of cement is 5 bushels and weighs 5 cwt.

One rod of brickwork in cement requires 36 bushels of cement and 36 bushels of sand.

One yard or 9 superficial feet of 1½ brickwork in cement requires about 2½ bushels.

One yard superficial of pointing to brickwork in cement requires about ⅛ of a bushel.

One yard square of plastering in cement requires ⅜ of a bushel.

CARPENTERS AND JOINERS.

To ascertain the number of super feet in a board or plank:—

Multiply the length by the breath. If the board be tapering add the breadth of the two ends together and take half the sum for the mean breadth, and multiply the length by the mean breadth.

TABLE FOR FLOORING.

The square of 10 feet equal, 100 feet super.

100 super feet equal 1 square flooring.

Number of ten feet boards to a square.:—

24	boards	5 inches	broad
20	„	6 „	broad
17	„	7 „	broad adding 1 foot
15	„	8 „	broad
13	„	9 „	broad adding 2½ feet
12	„	10 „	broad

Number of twelve feet boards to a square:—

20	boards	5 inches	broad
16	„	6 „	broad adding 4 feet
14	„	7 „	broad adding 2 feet
12	„	8 „	broad adding 4 feet
11	„	9 „	broad adding 1 foot
10	„	10 „	broad

FLOORING—One hundred super feet of flooring requires as follows:—

12½ of twelve feet deal board rough and unplained, or

12½ boards edges only shot with plane, or

13 boards wrought and laid folding, or

13½ of boards wrought and laid straight joint, or

14 of boards wrought ploughed and tongued, or

16 twelve feet battens rough and unplained

16½ of twelve feet battens, edges only shot with plane

17 twelve feet battens wrought and laid folding, or

18 wrought and laid straight joint

MORTAR.

One hundred of lime contains 25 striked bushels or 100 pecks.

One chaldron of lime is equal to 58⅔ cubic feet, or rather more than 2 hundredweight.

16½ heaped bushels, or 22 striked bushels, make one load.

Half a hundred of lime with proportionate quantity of sand will make 1 load of mortar.

A bricklayer's hod holds 20 bricks, or ⅔ cubic feet of mortar, or half a bushel.

MASONS.

Masons usually reduce their work to 2 feet in thickness.

All stones above 2 inches thick are usually calculated at so much per cubic foot.

Ashlar masonry requires mortar to the extent of ⅛ of its volume.

One cubic yard of rubble masonry requires 1⅛ cubic yards of stone and ¼ cubic yards of mortar.

16 cubic feet of Portland stone, 17 cubic feet of Bath, 15 cubic feet of Yorkshire or Paving stone, 12½ cubic feet of Granite, 13 cubic feet of Marble or chalk, 11⅛ cubic feet of limestone constitute one ton.

PLASTERERS.

A cask of Portland cement contains about 4 bushels, holds 5 cubic feet, and weighs 4¾ cwt.

A cask of Roman cement contains about 5 busls.

One bag of Plaster of Paris contains 14 lbs.; eight bags go to the bushel.

One bushel of cement will cover 2¼ yards if half-inch thick; 1½ yards if three-quarters of an inch thick; 1⅛ yard if one inch thick.

One bushel of cement and 1 bushel of sand will cover 4½ yards if half-inch thick, or 3 yards if three-quarters of an inch thick, or 2¼ yards if one inch thick.

4½ hundred of lime, 6 loads of sand, 15 bushels of hair, 2 loads of lath, cover nearly 1 rod plaster set.

3 hundred of lime, 4 loads of sand, and 10 bushels of hair cover 200 yards of render set.

1 bundle laths and 500 nails cover 4½ yards.

WHITEWASHING.—For whitewashing 100 super yards—12 lbs. of whiting, ½ lb. blue black, and 1¾ gallon of size are required if ONE coat only is given. For TWO coats 21 lbs. of whiting, ¾ lb. blue black, and 2¾ gallons of size are wanted.

SLATERS.

Slating is measured by the foot yard or square of 100 feet.

Rule to find contents of roof—

Multiply the length of the ridge by the girth over from the eaves to the eaves, allowing for the double row of slates at the bottom, or for how much one row of slates is laid over another. It is common to add the length of the valley or hip to the contents in feet.

120 roofing slates make a great hundred, and 1200 a thousand.

Average sizes and the names of slates are—Ladies 16 x 8, Viscountesses 18 x 9, Countesses 20 x 10, Marchioneses 22 x 11, Duchesses 24 x 12, Princesses 24 x 14.

One square of slating will require about 308 Ladies, 200 Countesses, and 110 Duchesses, weighing from 6 cwt. to 6½ cwt. and double the number of nails; for small slates less nails are required.

PAINTERS, GLAZIERS AND PAPERHANGERS.

PAINTING—For the first coat ½ lb. of paint to 4 yards super. For subsequent coats 1 lb. to six yards super. For stopping 1 lb. of putty to every 20 yards super.

TABLES FOR BUILDERS—*Continued.*

For tarring palings 1 gallon of tar and 1 lb. of pitch are allowed to 12 yards super for the first coat. For subsequent coats the same quantity is sufficient for 18 yards super.

PAPER.—A piece is 12 yards long and 20 inches wide and contains 60 square feet or $6\frac{2}{3}$ square yards. One dozen of border contains 12 yards.

To find the quantity of yards in a superficial quantity divide the number of superficial feet by 9.

To find the number of yards running, or pieces of paper there are in a superficial quantity, divide the number of superficial feet by 5, which will give the number of yards, divide the yards by 12 to ascertain the number of pieces. If there are any odd yards they are considered and charged as one piece.

EXCAVATING AND WELLSINKING.

24 cubic feet of sand or 18 cubic feet of earth or 17 cubic feet of clay make one ton.

One cubic yard of solid gravel or earth contains 16.57 upheaved imperial bushels before digging, and 27 heaped bushels when dry. An ordinary wheelbarrow holds about 1-20 of a cubic yard, and a navvy's barrow nearly twice as much.

WELLS.—The following is the approximate number of gallons of water for each foot in wells of the following diameter :—

3 feet diameter	44 gals.		7 feet diameter	239 gals.	
4 "	73 "		8 "	312 "	
5 "	122 "		9 "	$396\frac{1}{2}$ "	
6 "	176 "		10 "	$489\frac{1}{2}$ "

Vacation Judge (Winter and Christmas Vacation), Mr. Justice Lutwyche.

GENERAL RULES.

The Court will not sit in Banco on any day in Term except the four first days and the last day of the Term, unless by adjournment or special appointment.

At all sittings of the Circuit Courts, Crown business shall commence on the first day, and Civil business on the third day.

The Judge Ordinary in Matrimonial Causes will sit on any one of his Chamber days when there is business on the paper of which parties shall have given him notice.

Trials and hearings before a single Judge may be set down for any Chamber day of the Judge to whom the cause is assigned.

Chamber days and hours shall, except as hereinafter provided, be Mondays, Wednesdays, and Fridays, from 10 a.m. to half-past 10, unless there be business in progress ; and at 10 a.m. the Registrar shall send to the Associate a list of all summonses and matters returnable at Chambers, together with all affidavits and papers connected therewith.

Chamber days and hours shall, during the Christmas and Winter Vacations, be Wednesdays, at the same hour.

The offices of the Supreme Court shall be open from 9 a.m. till 4 p.m. in Term and Vacation, upon all lawful days except Saturdays, when the said offices shall be closed at 1 p.m.

The offices will be closed on New Year's Day, St. Patrick's Day, Good Friday, Easter Eve, Easter Monday, Queen's Birthday, Ascension Day, Prince of Wales' Birthday, St. Andrew's Day, Separation Day, Christmas Day, and three days following Christmas Day.

Christmas vacation will commence on Saturday, 15th December, 1877, and end on Saturday, 2nd Feb., 1878.

Winter Vacation will commence on Saturday, 1st June, 1878, and end on Saturday, 29th June, 1878.

At the time of going to press the arrangements for the Northern Circuits had not been made.

9. Thorn Ministry	From June 5, 1876, to March 8, 1877.
10. Douglas Ministry	From March 8, 1877.

DIRECTIONS FOR MAKING A WILL.

A WILL cannot be made in language too simple or concise; it must be written with ink, and must be signed at the end (of each sheet if there be more than one) by the testator in the presence of TWO or more witnesses.

The witnesses, who must not be interested in the will, must rigidly comply with every particular required by the attestation clause, at the end of which clause they must sign their names. A witness is not bound to know the contents of the will.

FORM OF A WILL.

This is the last Will and Testament of me made this day of One thousand eight hundred and as follows. I give, devise, and bequeath all my messuages, lands, tenements, and hereditaments, and all my household furniture, ready money, money secured by life assurance, goods and chattels, and all other my real and personal estate and effects whatsoever, unto my dear wife [or other person, as may be] her heirs, executors, administrators, and assigns, to and for her and their own absolute use and benefit, according to the nature and quality thereof respectively, subject only to the payment of my just debts, funeral and testamentary expenses and the charges of proving and registering this my will. And I appoint my said wife executor of this my Will, and hereby revoke all other wills.

In witness whereof I have hereunto set my hand the day and year above written.

[ATTESTATION.]

Signed published and acknowledged by the said as and for his last Will and Testament in the presence of us, who in his presence and at his request, and in the presence of each other, have subscribed our names as witnesses.

A CODICIL.

To a will is to be made with the same regulations as the will itself, and may be written thus :—This is a codicil to my last Will and Testament, bearing date the day of 18 and which I direct to be taken as part thereof. I give, devise, and bequeath, &c. As witness my hand this day of 18

NOTE.—Obliterations and alterations of any sort in a will ought, if possible, to be avoided; when of necessity made, they must be signed by the Testator and Witnesses on the margin, or as near to the alteration as possible.

Marriage after making a Will renders the Will void.

If a Witness is interested in the Will the claim to such interest becomes forfeited.

If a person wishes to dispose of all his property in one gift, the words "all my real and personal estate" may be used.

Personal Property left without a Will is devisable as under :—If the deceased should leave Children and no Widow, the whole property is to be divided equally among the Children. If he leave a Widow and Child or Children, the former is entitled to one-third, and the latter to the remaining two-thirds. If he leave a Widow and no Child, the former is entitled to half, and the next to Kin to the remainder as follows :—A Father, the whole amount. If no Father, or Mother, Brothers or Sisters, or their issue, equal portions. If none, Uncles, Aunts, Nephews and Nieces, equal portions.

CITY OF BRISBANE.

The Sydney Mail,

AND

NEW SOUTH WALES ADVERTISER.

A Journal of Commerce, Mining, Agriculture, Science, Mechanics, and General Information.

THE TURF, CRICKET, AQUATICS, AND OTHER SPORTS AND PASTIMES.

THE CHEAPEST FAMILY NEWSPAPER IN THE COLONIES.

HORTICULTURE IS NOW REGARDED as one of the favorite pursuits for those having a little spare time and a little space of ground. Cases are not rare even where lovers of plants and flowers, not having much time in daylight, spend many a happy hour in their little gardens and conservatories by lamp or candle light. For the purpose of assisting amateur gardeners, special articles and directions appear week by week.

THE KITCHEN GARDEN AND ORCHARD attached to villas and suburban residences require attention month by month, in preparing the ground, manuring, planting seeds and vegetables, pruning fruit-trees, &c., at the proper seasons. A special department for directions and information is devoted to the kitchen garden and orchard in the SYDNEY MAIL, which will be found most useful, especially where professional gardeners are not employed.

READERS IN THE COUNTRY DESIRING a newspaper for general news, information, and amusement, will do well to subscribe to the SYDNEY MAIL. It is the most useful family paper published in the colonies.

IN THE HOMES IN TOWN AND IN THE country, evening reading is a delightful pastime as well as instructive. To keep families supplied with such amusement and instruction, the proprietors of the SYDNEY MAIL have made such arrangements that works by the best authors are secured in London for publication in this journal, anticipating by several months the arrival of magazines and periodicals.

THERE IS NO ART JOURNAL PUBLISHED in the Australian colonies. To make up for the absence of such a journal, great attention is paid to the illustration department of the SYDNEY MAIL. An Illustrated Supplement is issued every week, the subject being of a local character, or selected by the London agent. Articles on Art in its various branches are included in this department of the SYDNEY MAIL.

FARM NOTES FOR THE MONTH, PASTORAL and agricultural notes, the weather, agriculture, pasture, and condition of stock, news from the provinces, produce cultivation, &c., occupy several pages of the SYDNEY MAIL, and so make it a paper for all interested in agricultural and pastoral pursuits.

The Turf, Outdoor Sports, Aquatic Pastimes are specially treated in Separate Departments

THE CURRENT TALES ARE THE PICK OF ENGLISH FICTION WRITINGS.

Besides the Weekly Illustrated Supplements, Separate Lithographic Drawings are issued from time to time.

Also, published periodically, in connection with the SYDNEY MAIL, a Series of Views in and about Sydney. Series No. 1—STREET ARCHITECTURE, being a collection of views of the Principal Buildings, Stores, Banks, Insurance Offices, connected with the Port of Sydney.

Price, Sixpence per Week.

COUNTRY ORDERS PUNCTUALLY ATTENDED TO.

THE LEADING JOURNAL IN IPSWICH AND WEST MORETON.

The Queensland Times,

ESTABLISHED 1859.

PUBLISHED EVERY TUESDAY, THURSDAY, AND SATURDAY.

IS one of the oldest, most popular, and most influential Newspapers published in the Colony, having a very much larger circulation than that of any other journal published outside of Brisbane.

Besides having a more extensive circulation in Ipswich and West Moreton than any other paper, it has a very large number of supporters in the Darling Downs and Southwestern Districts It is consequently an excellent MEDIUM FOR ADVERTISING, particularly as the charges are very moderate. A liberal discount is allowed on continuous advertisements. With each Saturday's issue is presented gratis A LITERARY SUPPLEMENT, containing reading matter of an instructive and entertaining character. Terms, 5s. per quarter in advance ; 6s. credit.

PARKINSON, STEPHENSON, & KIPPEN.

THE "MARYBOROUGH CHRONICLE,"

Published every Tuesday, Thursday, and Saturday.

ESTABLISHED, NOVEMBER, 1860.

SUBSCRIPTION: 9s. per Quarter, Paid in Advance; 10s. per Quarter, Credit

THE CHRONICLE has, from its establishment, maintained its position as the

LEADING NEWSPAPER

Of the Wide Bay and Burnett Districts, and has long been recognized as the

BEST ADVERTISING MEDIUM,

OFFICE—KENT STREET, MARYBOROUGH.

IMMIGRATION ACT OF 1872.

REMITTANCE PASSENGERS.

BRITISH.

PERSONS resident in Queensland, wishing to obtain Passages to the Colony for their Friends or Relatives in the United Kingdom, can do so under the provisions of the Immigration Act of 1872, by paying to the Immigration Agent in Brisbane, or to any of the Clerks of Petty Sessions in the Colony, amounts in accordance with the following scale :—

Males and Females between 1 and 12, each	£1
Males between 12 and 40, each	2
Females between 12 and 40, each	1
Males and Females above 40	4
Infants under 12 months	FREE.

FOREIGN.

Persons resident in Queensland, wishing to obtain Passages to the Colony for their Friends or Relatives, from the Continent of Europe, can obtain Free Passage Tickets, available for any Queensland immigrant ship leaving London or other British port, on application to this Office, or to any Clerk of Petty Sessions throughout the Colony.

Applicants must clearly understand that these Tickets do not include the Passage from the Continent to the port of embarkation in Great Britain, the entire cost of which must be defrayed by the Immigrant himself.

ELLIOTT'S CHAMPAGNE QUININE WINE.

Highly recommended by the Faculty, and acknowledged to be the purest and cheapest tonic yet introduced; it is the best restorative for the young, weak and aged; it strengthens the whole system, and stimulates the appetite, and is invaluable for Indigestion, Nervousness, Gout, Rheumatism, Fever and Ague. It has also proved a most invaluable and agreeable stomachic to all suffering from general debility and loss of appetite. A wineglassful twice a day will be found particularly grateful and efficacious in all cases where a cordial tonic is required. Is far superior to sherry and bitters.

Brisbane, January 3, 1876.

GENTLEMEN,—I beg to inform you that I have examined your Quinine Wine, and cannot find anything deleterious in its composition.

It contains at least half a grain of dry pure sulphate of quinine in each ounce: and from the quantity of extracts of well-known bitter tonics in its composition, and especially that of sulphate of quinine, in the well-adjusted proportion of half a grain to the fluid ounce, or two table spoonfuls, will recommend it in my eyes and those of the medical profession as being one of the best tonics ever introduced to the public.

I have the honor to be your obedient servant,

KARL THEODORE STAIGER,

Government Analytical Chemist.

Messrs. ELLIOTT, BROS. & CO., Brisbane.

BLOOD PURIFIER.

SARSAPARILLA has from time immemorial been considered the best agent for this purpose.

Dr. BAYLEY'S COMPOUND EXTRACT of SARSAPARILLA contains all the valuable properties of this plant, together with the advantage of being a pleasant and palateable beverage. For those who abstain from alcoholic drinks this will act as a gentle stimulant, which renders it peculiarly adapted to a hot climate.

THE WEEK:

THE BEST PAPER IN QUEENSLAND

THE great demand for the *WEEK* having shown the Proprietors that the paper is looked upon by the general public as a desideratum; and, at the same time, it appearing that the public wants could be better satisfied by increasing the dimensions and extending the scope of the paper; it has been decided to

PERMANENTLY ENLARGE

THE WEEK,

FROM THE FIRST OF JANUARY NEXT;

And to add such new features as the experience of the past two years suggests as being better calculated to meet the requirements of the people.

FROM THE BEGINNING OF THE YEAR

THE WEEK will consist of 36 Pages, with an occasional Supplement. It will contain all the Local, Colonial, European, Asiatic, and American News; Interesting and well-written News Letters—from London, Sydney, and Melbourne, and from all the important centres of population in Queensland; Special European Telegraphic News; Original Tales and Sketches, Leading Articles on the most significant topics of the day; Articles and Essays bearing on the leading producing interests of the Colony; the inimitable ODD NOTES, by a Bohemian; TOWN TALK; Columns specially devoted to Farm and Station, Sports, Pastimes, and Amusements, Chess and Draughts, Poetry; The Ladies—including Latest Fashions; The Housewife—including valuable Original Recipes and Household Hints; Science; Law; Medicine; Natural History; Religious Intelligence; Statistics—and an endless variety of useful information and amusement. In short, *THE WEEK* will more than ever justify its claim to be the Best Newspaper published in Queensland.

As this enlargement involves a considerable additional outlay, an increase in the price of the paper is necessitated.

The Subscription will accordingly be

SIX SHILLINGS PER QUARTER,

AND

TWENTY-ONE SHILLINGS PER ANNUM.

Single Copy, Sixpence.
